

Preface

NTHEM

The complete MIDI program for the Macintosh®.

Anthem is Shareware - you may try the program for a short time - but if you like it and want to keep using it, please send in the requested \$60 registration fee. Six years went into developing this program; please be fair and help support it. See the chapter "How to Register Anthem" for complete instructions.

Please read this manual. At a minimum, read the chapter "Quick Start" which explains the basics of how Anthem can be used effectively.

This manual was written using DOCMaker, the shareware document creator from Green Mountain Software. If you have any problems using or printing from this manual, contact Green Mountain Software at <mswall@aol.com> or <greenmtn@Traveller.com>. If you have questions about Anthem, contact Sir Rah Productions. Registered users will receive eMail support.

Feel free to submit comments, suggestions, and bug reports.
