Let's draw a pitchbend curve as an example of drawing a controller curve.
The first step is to change the drawing mode of a track to PitchBend mode.
Use the popup menu on the track tool pallete
and select pitch bend as shown below.

o change the track staff to display pitchbend curves, first select the track
staff to be changed and click on the mode change button as shown.

o draw a curve select the drawing tool as shown.

hile holding the option key down, draw into the track pane.
