Desktop scenes that change with the time of day!

Bring the outside indoors with Sundial™, a software program that displays stunning time-lapse scenic photography on your computer desktop. Volume I features ten breathtaking scenes from California, including the stark drama of Death Valley, the magnificent expanse of the Golden Gate Bridge, the awesome beauty of Yosemite and the towering glory of Mount Shasta. Each scene contains 24 hours worth of images, which you can preview in seconds prior to selecting your favorite scene.

Sundial scenes change every five minutes and are synchronized to the current time, so you can enjoy the day as it slowly progresses. In addition, using a state-of-the-art software algorithm, Sundial adjusts each movie so that sunrise and sunset coincide exactly with the actual events outside your window, every day of the year. Having Sundial on your computer is the next best thing to being outdoors!

Take a break from the work day and reconnect to nature with Sundial, a fun, relaxing way to tell time!

Transform your computer into a dynamic vista point!
