

What is ScrapIt Pro?

ScrapIt Pro, is the editable, searchable multimedia scrapbook... and a mini-word and form processor to boot! Anything you can copy to the clipboard can be pasted and stored in a ScrapIt Pro file. Features full support of Apple's latest technology; Drag & Drop, QuickDraw 3D, Speech, and more!

Need a place to store, sort, display and search all of your text notes, forms, sounds, GIF files, JPEG files, QuickDraw 3D files? Look no further, ScrapIt Pro is the utility you've been looking for!

ScrapIt Pro has won many awards in the last several years!

Text items or Sounds can also be created from within ScrapIt Pro. ScrapIt Pro has many uses, here's a list of some ideas:

- Use it as a super note pad to store (and create) all those notes you can't seem to keep track of.
- Use it to fill out and store frequently used forms (like invoices, contacts, expense reports, envelopes, etc.).
- Use it to store your favorite letterhead(s) for your letter writing.
- Store all your email.
- Store, sort and view all the GIF or JPEG files you collect from the internet.
- How about storing all your favorite sounds or QuickTime™ movies in a scrap file.
- Keep a clip-art library of all your favorite pictures for use in letters, page layout programs, etc.
- Keep all your favorite recipes in a scrap file for instant access.

Those uses are just a start. Write and tell me what ScrapIt Pro does for you.

Some ScrapIt Pro Features:

- PowerMac & 680x0 native code!
- Store and edit data in forms as well as perform calculations on data in the forms!
- Searchable comments for each item
- QuickDraw 3D support

- Full ArchiCAD support (copy/paste from/to ArchiCAD)
- Search & Replace
- Scrap File merge
- Much better importing capabilities (grab multiple PICTs or sounds from any file)
- Import/Export GIF, JPEG, QuickDraw 3D, and all file types supported by Plugins
- View GIF, JPEG & QuickDraw 3D items!
- Stretchable lists
- Can now sort by date
- Windows are user customizable
- Multiple file support (open up to twenty scrap files at the same time, depending on memory)
- Each file can have its own window color and sorting options
- Word and character count for text items
- Speech Manager support
  - If you have the Speech Manager installed, have ScrapIt Pro speak the text in any text item!
- Drag & Drop support
  - If you have the Drag manager installed, drag PICT, GIF, JPEG, Sound, TEXT, QuickTime Movie, Paint files and all file types supported by Plugins to the ScrapIt window.
  - Drag items between scrap file windows or any other applications that support Drag & Drop.
- Sound recording
  - If you have the ability to record sound, use ScrapIt to record and store any sounds.

#### New features in version 5.4:

Added forms capabilities so forms can be filled in directly on the screen! Also, many interface updates like; multiple item selection (for printing, playing sounds, deleting, exporting, etc.). When playing sounds, importing, exporting, etc., can now put ScrapIt Pro in the background and go on with other tasks. Contextual menus are now available (Control-click to access menu in a scrap file) whether using OS8 or System 7.

What comes in the ScrapIt Pro package?

Your ScrapIt Pro package should contain the following files:

- ScrapIt Pro
- ScrapIt Pro Documentation
- ScrapIt Pro Help
- Plug-Ins Folder
  - ScrapIt Forms Folder (which includes several sample forms)
- ScrapIt Pro - Read Me First! (a SimpleText file)

- QuickScrap - read me! (a SimpleText file)
  - Registration (open me!)  
(fill out the registration form with this application)

### My Thanks!

I would like to thank all the people who've helped me so much with this project, by testing it, pointing out the bugs and suggestions (including Michael Annino, Rick Baggott (for loaning me his SE for testing), Byron Barker, Lofty Becker, Neal Blank, Janet Calvert, Dan Deacon, Ezra Ekman (for testing and creating some of the artwork), Mike Fahl, Joyce C. Farruggia, Dee Forsythe, Jack M. Fox, Steve Holden, Byron Hukee, Oliver Johnson, Stephen Kayner, Larry Kuhn, Steve Lawson, Carl Lewis, Sean McNiff (for letting me test on the computers at his work and for testing), Casey Meaden, Michael O'Henly, Jijnes Patel, E. Joseph Pred, Kevin Savetz, Andrew Schultz, Jim Sorensen, Edwin M. Uyeki, Lorne Walton, Walter Weiss) and those who have written with suggestions over the years (many of those suggestions have been implemented). I couldn't have done it without you, thanks! Also, thank you to everyone who has registered and supported my shareware efforts.

Also, thank you to Eddy J. Gurney for his code to get multiple files, Aaron Giles for the JPEG code, Jordan Zimmerman for the PICT selection marquee code, Marco Piovanelli for the WASTE text engine. Thanks to the folks at Graphisoft for the help with solving the ArchiCAD problems with ScrapIt Pro!
