Graph 3
A line graph with all the trimmings
/frgraph3~

    This demonstration allows you to enter data in res-
ponse to questions, select a graph type, and view the
graph. When done you can either elect to do another graph
or return to the Graph main menu.
    These graphs are fairly simple. The X-range legends
have already been set up for you, as have the categories
for the data. Once you get the hang of it, you can start
making graphs on you own.

/xme15~/xgc15~

Line
Selects Line Graph
