

ARIS HexEdit 1.1

for Microsoft Windows NT

REGISTRATION INFORMATION:

Definition of Shareware. . .

Shareware distribution gives users a chance to try software before buying it. If you try a shareware program and continue using it, you are expected to register. Individual programs differ on details -- some request registration while others require it, some specify a maximum trial period. With registration, you get anything from the simple right to continue using the software to an updated program with printed manual.

Copyright laws apply to both shareware and commercial software, and the copyright holder retains all rights, with a few specific exceptions as stated below. Shareware authors are accomplished programmers, just like commercial authors, and the programs are of comparable quality. (In both cases, there are good programs and bad ones!) The main difference is in the method of distribution. The author specifically grants the right to copy and distribute the software, either to all and sundry or to a specific group. For example, some authors require written permission before a commercial disk vendor may copy their shareware.

Shareware is a distribution method, not a type of software. You should find software that suits your needs and pocketbook, whether it's commercial or shareware. The shareware system makes fitting your needs easier, because you can try before you buy. And because the overhead is low, prices are low also. Shareware has the ultimate money-back guarantee -- if you don't use the product, you don't pay for it.

ARIS HexEdit Disclaimer - Agreement. . .

Users of ARIS HexEdit (HEXEDIT) must accept this disclaimer of warranty: HEXEDIT is supplied as-is. The author disclaims all warranties, expressed or implied, including, without limitation, the warranties of merchantability and of fitness for any purpose. The author assumes no liability for damages, direct or consequential, which may result from the use of HEXEDIT.

Individual Registration. . .

HEXEDIT is a copyrighted shareware program by Alexander Riedel, President, ARIS Germany. The evaluation version of HEXEDIT is offered at no charge to any potential user for evaluation. Feel free to share it with your friends, but please do not give it away altered or as part of another system. The essence of "user-supported" software is to provide personal computer users with quality software without high prices, and yet to provide incentive for programmers to continue to develop new products.

If you find this program useful and find that you are using HEXEDIT after a 30-day trial period, you must make a registration payment of \$20.

Checks must be made payable to Alexander Riedel. Checks must be drawn on any US or German bank. For checks of other countries please add \$3 handling fee.

You will be sent by return mail a registered copy of the latest version of HEXEDIT with a hard copy of the user's manual.

Registration also entitles you to user support by mail or CompuServe E-mail for at least one year, to a free copy by e-mail of the next major update to HEXEDIT.

You may order your registration by one of several ways:

- o Directly, by sending cash, check or money order to

Alexander Riedel Informations-Systeme
Parkstr. 2
D-85646 Anzing
Germany

- o You may also register online if you are a CompuServe member. Type GO SWREG with registration ID 3551.
The shipping and handling fees charged by CompuServe are for air mail shipping outside europe and for ground mail within europe.

Site Licenses. . .

For a "corporate" user, in which a company wishes to provide HEXEDIT as a workplace resource for employees, the company's registration may be extended to a license for multiple users in the following way:

The single-user license conferred with original \$20 registration may be extended to any number of additional users at the rate of \$10.00 per additional user, with no increment in the original benefits (ie., no additional hard copies of manual will be sent, only one copy of the future upgrade will be sent, technical support provided only to the original registrant). However, there is a minimum of 5 additional copies you have to purchase in order to be recognized as a "corporate user".

I recognize that the number of users afforded access to HEXEDIT in a large company or network will vary as employees come and go and users are added and subtracted, and so I ask only for a good-faith estimate, BUT based on the total number of users afforded access, NOT on some lower estimate of the number of users who might be using HEXEDIT simultaneously. The company may at its own expense print this number of additional manuals and disks to distribute to the added users. I have priced this license extension so reasonably that this additional cost per additional authorized user is affordable for the smallest to the largest company, and represents a small fraction of the workplace productivity gain benefiting each user.

Shareware Distribution. . .

Distributors and BBS sysops recognized by the Association of Shareware Professionals (ASP) as adhering to its guidelines for shareware distributors may begin offering HEXEDIT in their catalogs/BBS services immediately.

Other distributors whose only remuneration is a nominal fee for the disk itself, and whose literature makes it clear to their buyers that the program material must be separately purchased from the author, may also offer HEXEDIT immediately, but should inform me so that I can provide them periodic updates. Distributors who wish to sell HEXEDIT packaged as or in a retail product must contact me, and are NOT authorized to distribute this version of HEXEDIT without prior approval.
