===========
artWORKS 1.0
    This is a two step crack:

    Step #1: To get bogus personalization info into the program, and have the program init itself

    CODE #148 Change
    +DC    6728->6028
    +116   6670->4E71
    +11E   6D66->4E71
    +18A   6714->6014
    +7E2   670A->4E71

    Run the program and personalize it, then quit and do

    STEP #2: Tomake it believe the personalization is valid and skip repersonalizing

    CODE #14 Change

    +9B2   6400 0224 -> 6000 0224
    +BDE   6E00 0094 -> 4E71 4E71

    now you should have a personalized artWORKS that works perfectly
    note this may or may not remove the network copy protection, but i think it probably does.
