The Teen Digital Diva demo contains two cool game features: 7th Avenue and Make Me Over. Download now to get in touch with your digital side!

This demo temporarily requires 32 MB of uncompressed hard drive space to install. However, it will only occupy 12.2 MB after it's installed.

You may need to install DirectX, which Teen Digital Diva needs to run. DirectX is not included with the Teen Digital Diva demo, so you need to download it separately. You only need to download this if you don't already have DirectX 5.0 or better installed on your computer. [Error: Reference source not found](#).

Demo System Requirements:

- Windows 95/98 with 100% compatible computer system
- Pentium 90 MHz processor
- 16 MB RAM
- 4 speed CD-ROM
- DirectX compatible sound card
- Standard mouse and keyboard

Important Notes:

When you're installing the Teen Digital Diva Demo, some files will be copied to your Windows Temp folder. If you cancel the installation process and then try to reinstall the demo, you may receive an error message stating there's not enough free disk space left in the Temp directory. Go to your Windows Temp folder (C:\Windows\Temp) and clear out all files before attempting to reinstall the Teen Digital Diva Demo.

This product requires your system to have the latest Windows drivers that can fully support Microsoft's DirectX 5.0 or better.

Please see the ReadMe.doc or ReadMe.txt files in the Teen Digital Diva demo after installation for more details on playing the game.
