

SLK Brabus V 1.0.

I'm back again with another brilliant Mercedes. Now it's not a Mercedes-Benz, but another cool car. My Brabus SLK represents the convertible version of my SLK, but with a little bit MORE POWER. Drive the car, love it and tell me, if really you can live without it. I don't think so.

Installation:

Unzip the car.viv file into a subdirectory called "SLKB" in your NFS3/gamedata/carmodel folder.

Used tools:

- VIV Wizard V.07
- CarCAD (4)
- Corel Photopaint 7.0

This car is based on my SLK. It has a little MORE POWER, a new dashboard, bigger wheels, different textures and a new 3D mesh. It also has a better performance and brakes (if you girlish guys out there need that...).

But the car is more difficult to handle than some other even-my-mommy-is-able-to-beat-your-best-time-on-Hometown-with-that-car car. So it won't be so boring to drive. Please don't copy my work, update the car if you want, but DON'T COPY IT! I HATE THAT!

Special thanks to:

Thomas: Your stuff is a great job again. This guy is great!! Thanks for your help!

Ivan for the pictures,

Jkay for the rims,

the authors of VIV-Wizard and CarCAD,

me, because I am that good!
