1.7 Meanings of the Entries

The meanings of the Entries

[Name of the Production]

Producer : Name of the producing Group

Coder : Name of the Programmer(s)

Graphician: Name of the Graphician(s)

Sounder : Name of the Musician(s)

Designer : Name of the Designer(s), Ascii-Maker(s), Raytracer(s), a.s.o.

Editor : Name of the Main-Editor(s)

Size : size of the product in its form in the net (or unpacked)

System : lists up the configuration used by the production
 (OCS, AGA, HD, Memory, Kickstart-version, OS-version);
 HD-installable means that a HD is not required
 (in opposition to a simple remark "HD"); if there is
 no remark on the system-entry the demo will most probably
 work on all systems (some problems may occur on
 040-processors and higher and on A3000-machines, no
 tests available for that in the most cases)

SecretPart: explains what to do to reach the secret part or an
 intermedia-part in which the user can influence the demo

How2Handle: describes how to use the demo (Relo, Exit, KillAga),
 how to fix it or install it on harddisk, a.s.o.

Remark : anything else to be added

Genre : What is the Production exactly?
 (Diskdemo, Filedemo, Intro, Sounddisk, Slideshow,...)

WhatIsIt? : This entry tells you what people think about
 this single production ... totally subjective. :)

The Future

The guide will be updated about every 4th month, so there will
be 3 issues in a year, one in mid-January (after The Party in
Denmark), one in late May (after The Gathering) and one in late
August or mid-September after all the summer-parties (see the
calendar for the exact dates).

Some parties are still missing. If I find the time to included
them, this will of course be done. Also some productions are not
yet listed in the index. Soon to come though ...

What would you like to see next in "TSG"? Send me your comments
and wishes!

1.12 Where can I order these demos?

WHERE CAN I GET THIS DAMN STUFF FROM?

The most of the productions listed in The Scene can be found in the

Aminet

. Meanwhile the Aminet administrators and several distributors are selling CDs containing this material as well, such as the Aminet CDs or the Euro-Demo-CDs from Almathera.

-->

(PD-Distributors)

.

To avail exact information about these CDs try to get the guide-text called "Amiga CD-Rom Guide V1.6". It can be found in the

Aminet

at docs/hyper or can be ordered directly from the author

Anders Bakkevold

.

If you, by chance, can't get your hands on a demo you would like to call your own, you can contact us for getting information like addresses of distributors or exact net sites. If possible (i.e. if we have the wanted production) we are also willing to copy this for you, but please notice that we are no cheap source for getting demos from. So if you would like to receive a demo, then send the disks being needed for it plus the stamps for sending your letter back. And please notice that the maximum disk number we will copy for you is 5 disks (except if a production needs more disks, like Suburban Base's musicdisk) ... We are sorry for these conditions, but we are no millionaires and we don't want to hang loose behind our computers the whole day. :)

We also plan to release about 3Gb (!) of the best scene stuff on CDs for a price of 20 DM each. If you want to order one of those CDs or request a catalogue, don't hesitate to send me a short mail.

.

Thanks to all who sent me mail yet. Nothing new happened to the CD projects right now as the CD burner is not available yet and it will take a while to copy, pack and burn all the stuff. :(

1.14 How to support The Scene

How to support The Scene

This guide needs your help! As I am not able to get all scene releases at all I have to rely on the support and help of you. I am always in search for further and concrete information or corrections of the old entries plus information about new productions or parties (like your own lists, party reports, competition results, reviews, articles or what so ever). If you send information (at least 2Kb of plain ascii) you will get the next updated version for free (please send a disk) and your name will be added to the honorable credits!

1.20 What is <The Scene Guide>?

What is The Scene Guide ?

This guide was written and compiled for the purpose to unite all releases from the important Amiga-Scene-Parties into one list, mainly as a small orientation for everybody who collects or searches for special productions or for productions from special groups or who wants to gather information (like hardware requirements, single producers or what so ever) about a special production. I hope this guide is helpful for at least some of you :)

This guide does not include:

- pack series (rarely own group's file demos collections)
- mag-parts of any pack series
- any productions including nazi-propaganda
- sounddisks just playing a module with no code and GFX
- cheat disks, doc disks or solution disks
- games or game-clones
- tools or tool-clones
- the most of those ugly hardcore demos and slideshows
- various private module or slideshow collections
- any stuff (PD-series) from commercial PD-distributors.

Productions in this guide are only pure ...

- file demos (dentros)
- disk demos (megademos, trackmos)
- intros
- packmenu previews
- diskmags
- sounddisks
- slideshows.

I hope that you can find use for this guide and that you are thinking about

supporting me
in the further development. Thanks in advance!
