Polis documentation

This documentation file accompanies:

1) **Polish.bmap**, a 10, 12, 14, 24 point screen font,
2) **Polis**, a downloadable PostScript font.

For printing to a PostScript printer (such as a LaserWriter), you must have **Polis** in your *system folder*. Using the fonts on the screen requires you to have the **Polish.bmap** installed in your *system file* with Apple's Font/DA Mover 3.8 or available (e.g. in a *suitcase* if you use SuitCase II).
You can print this file and see the Polish characters without having the fonts installed, because they are put in this file as pictures.

ŚWIŃSKIE GĘGANIE ŻAB I ĆWOKÓW DUSIMY WSPÓLNIE Z MŁODĄ GAŹDZINĄ O OGORZAŁEJ ŹRENICY

These

świńskie gęganie żab i ćwoków dusimy wspólnie z młodą gaździną o ogorzałej źrenicy.

fonts are so called *option fonts*: They don't use a Polish keyboard layout, but are created by using the option key in combination with other characters. Especially when you only type Polish occasionally, *option fonts* are more convenient than *keyboard fonts*.

ą	option-a	ę	option-e \<space\>
ł	option-l	ń	option-n \<space\>
ś	option-s	ć	option-c
ż	option-z	ź	option-x
ó	option-o		

I did not make those fonts, I only wrote the non-Polish part of the documentation. I know one thing, however: these fonts are not for commercial use !

Pieter Stouten \<stouten@embl.bitnet\>, 18th September 1990.
