

## About this Font

This font is distributed as shareware as part of a promotion for the Scriptorium Font Library.

If you use this font for thirty days or for any publication or commercial purpose you are obligated to register it as shareware.

To register the font you may pay a \$5 registration fee to Ragnarok, or you may order a sampler disk or the disk on which the font is featured for \$15. The later option is the best deal because you'll get a whole disk of legitimate, registered fonts for a very low price.

If for some reason you wish to distribute this font as part of a shareware collection or package, please contact us first at the address (netmail or US Mail) or phone number given below.

The rest of this is our standard catalog. If you like this font you'll love some of the hundred-plus other fonts in the Scriptorium Font Library.

## The Scriptorium Font Library

The Scriptorium Font Library is a collection of fonts designed by Dave Nalle of Ragnarok Games for use in their publications. These fonts have now been made available by mailorder direct from Ragnarok.

Provided here is an up to date listing of all the font disks available at this time. Each disk includes as many fonts as we can fit on it. They are fully registered when you purchase the disk.

### SFL-1001: Font Sampler I

This disk includes 3 text fonts, 3 calligraphic fonts, 3 display fonts and 3 specialty fonts taken from our original series of font disks. It includes our very popular Taranis font as well as the new Fabliaux font, the medieval calligraphic fonts Bastarda and Courthand, plus two fonts from the Ysgarth role-playing game and the uniquely mystical Goetic font based on 18th century magical scripts. \$15. Update \$5.

### SFL-1002: Font Sampler II

This contains a new variety selection of fonts, including text, display, decorative and calligraphic fonts taken mostly from our second series of font disks. \$15. Update \$5.

### SFL-2001: Text Fonts

This contains 10 unique serif and sans-serif fonts which meet the high resolution demands of all text uses. The collection includes some elegant traditional fonts (both serif and sans-serif) like our Tancred and Palomides fonts, plus some very unusual offerings like the Kelmscott font based on William Morris' Troy font from the Kelmscott edition of Chaucer's works. \$15. Update \$5.

### SFL-2002: More Text Fonts

A collection of sophisticated and flexible text fonts based on classic styles and on modern designs. Includes 6 serif fonts and 6 sans serif fonts. Available in the Fall of 1993. \$15. Update \$5.

#### SFL-3001: Display Fonts

This disk features 10 attractive display fonts, including several art nouveau and medieval styles, plus a couple of unusual special use fonts. Our favorites are the Starfield font, which looks like a scattered field of stars, the Buccaneer font, drawn from 17th century wanted posters and the Ariosto and Elysian fonts based on hand drawn fonts of the Munich Jugendstil movement of the 1890s. Because these are display fonts they may not all include both upper and lower case letters, but they include all characters which are available and we will expand many of the character sets as we continue to work with them. \$15. Update \$5.

#### SFL-3002: More Display Fonts

This disk features 12 new display fonts, including a number of interesting Art Nouveau and early modern book plate styles, such as Beaumarchais, Averoigne and Cymbeline. \$15. Update \$5.

#### SFL-4001: Calligraphic Fonts

This disk includes a variety of calligraphic fonts, including several Celtic-style fonts, fonts based on medieval and renaissance calligraphy and calligraphy from several 19th century art nouveau designers. Because these are based on genuine calligraphy they may not include all the characters you may expect and may include specialty characters or strange alternate forms for some letters. \$15. Update \$5.

#### SFL-4002: More Calligraphic Fonts

This disk includes a variety of medieval English, French and Italian lettering styles plus several Eastern European styles and a special font based on the calligraphy of Howard Pyle. This disk is now available. \$15. Update \$5.

#### SFL-5001: Specialty Fonts

A collection of fonts for languages which don't use the English alphabet, including both obscure real world and historical languages and role-playing game world languages. Check out the Bahairic and Futhark fonts if you want something really different. Oh, and did you say you were going mad because you couldn't decorate your computer-generated icons without Church Slavonic? Well, try Patriarch. It reads in English, but looks like Church Slavonic. \$15. Update \$5.

#### SFL - 6001: Decorative Fonts

A special assortment of art fonts where each letter is a decorative initial or small picture. It includes several illuminated manuscript alphabets, the extremely intricate Maidens font and some Art Nouveau floral motifs. Because of the detail of these decorative initials only 5 fonts are presented on this disk, but they are well worth it. \$15. Update \$5.

#### SFL - 6002: More Decorative Fonts

This collection of decorative fonts includes some medieval classics and some very detailed 19th century fonts, as well as decorative initials based on the works of Howard Pyle and John D. Batten. Because of the intricacy of these fonts only 6 fonts are presented on this disk. \$15. Update \$5.

#### SFL - 7001: Art Fonts

This is a collection of illustrations in font form, including animals, heraldic shields, celtic spirals, arthurian miniatures, floral embellishments and more. These fonts are intricate so only eight could fit on the disk. \$15. Update \$5.

#### SFL - 8001: Runic Fonts

A collection of runic fonts, including Scandinavian runes, Celtic Ogham script and early medieval alphabets from northern Europe. Available Fall of 1993. \$15.

#### UPDATE POLICY

Each of our font disks is updated with new versions at least once every three months, with updates being released on the first of January, April, July and October. If you send in your original disk and \$5 we will update you with the latest versions of all the fonts on that disk. Most of our fonts are brand new, so expect pretty substantial changes with some of the updates over the next year or so.

#### SHAREWARE NOTE

Support shareware. Many of our fonts are distributed as shareware for promotional purposes. If you see our fonts being circulated as unregistered copies (without our shareware notice), let us know...or let the culprit know that you don't approve. These fonts are too damned cheap for anyone NOT to pay their shareware fee or order them on disk.

#### TO ORDER

Send check or money order for the appropriate amount to the address provided below. Please specify your computer type. There will be a \$5 reorder fee per disk if you fail to specify your computer type and get the wrong disk as a result. Advance order items will be sent as soon as they are released. Overseas orders please include \$3 per disk for shipping and handling. Wholesale information is available on request.
