

## Galactica: anno Dominari

Conquer the galaxy!

### About This Installer

This Installer will install the game folder to the volume of your choice. Feel free to move this folder after installation, but be aware that the "uninstall" option may not work if the folder is moved.

### System Requirements

You can use the Installer and the software it installs on Macintosh computers operating with System 7.1 and later, Color QuickDraw, at least 8megs of RAM and 5 megs of HD space.

### More on Installation

Some virus-protection programs (GateKeeper, SAM, Virex, etc.) may warn you about some of the operations the installer performs. This is normal and you should always give the installer permission to perform the requested operations. You may find it easier to disable any virus-protection programs before running the installer.
