We hope you enjoy playing Black Hole as much as we do! Thank you for taking the time to download this program and read this. As introduction; ParaGraph International is a Russian-American partnership, with headquarters in Sunnyvale, CA with a large development office in Moscow. Our long term vision is to build AlterEgo, a parallel virtual world which will allow its visitors to travel to different times and locales. We are dedicated to building AlterEgo in a way that is positive and educational.

WE HAVE SEVERAL OTHER GREAT GAMES AVAILABLE!. Additionally, we have some the best Cyrillic fonts available anywhere (in addition to ParaWIN 1.0, a multilingual utility that allows you to switch keyboard layouts (say Cyrillic and English) at the touch of one key). We will send info on our other games or other products by e-mail or regular mail on request.

Feel free to share it with your friends, but please do not give it away altered or as part of another system. The essence of "user-supported" software is to provide personal computer users with quality software without high prices, and yet to provide incentive for programmers to continue to develop new products.

An example is that this software may be used by any number of people and may be freely moved from one computer location to another, so long as there is no possibility of it being used at one location while it's being used at another. Just as a book cannot be read by two different persons at the same time.

Commercial users of Black Hole 1.1 must register and pay for their copies of Black Hole 1.1 within 30 days of first use or their license is withdrawn. Site-License arrangements may be made by contacting ParaGraph International.

This authorization will be automatically granted to distributors recognized by the (ASP) as adhering to its guidelines for shareware distributors, and such distributors may begin offering Black Hole 1.1 immediately (However ParaGraph International must still be advised so that the distributor can be kept up-to-date with the latest version of Black Hole).
