

LAN NETVIEW FOR SOFTWARE DEVELOPERS WORKSHOP, AUGUST 23-27, 1993

August 9, 1993

PSP LAN Systems Workshops announces the LAN NETVIEW FOR SOFTWARE DEVELOPERS Workshop. This 5-day course teaches you how to develop a managing application that can be integrated into the LAN NetView distributed management environment. This is a PSP Developer Assistance Program technical course which includes lab exercises and lectures specific to the LAN NetView framework for distributed systems management. Students become familiar with the underlying standards-based protocols and programming interfaces which define management of heterogeneous networks. This course reinforces key principles, topics and methods by using diagrams, coding examples and coded applications. This course provides an opportunity for early developer involvement with the LAN NetView products.

OBJECTIVES

After completing this course, you should be able to:

- Understand the LAN NetView framework and family of products
- Understand programming issues related to OSI systems management concepts, which address implementation and performance of a management application
- Develop a managing application using XOM and XMP APIs and the LAN NetView platform
- Navigate through and manage system resources using the View graphical user interface
- Integrate a managing application with the topology display of the View user interface through the use of the View and System Object Model (SOM) APIs

PREREQUISITES

Before taking this course, you should have:

- C Language Programming experience
- Familiarity with object-oriented programming concepts
- Basic understanding of networking and communications protocols

AUDIENCE: Experienced C Language programmers who want to learn the concepts, terminology and programming interfaces to manage network resources in an OS/2 environment.

FORMAT: Classroom (Traditional stand-up class): Public, Private

LOCATION: IBM Austin, Texas

COST	Tuition:	\$ 1,800 USD
	Private Class Price:	
	1-14 Students:	\$22,500 USD
	Each additional student:	\$ 500 USD

REMAINING SCHEDULE FOR 1993:           September 20-24  
  October 18-22  
  November 8-12

TO REGISTER: Use MSE or call 1-800-IBM-TEACH, Monday through Friday, 8:00am to 8:00pm EST. From outside US, call (602) 629-2731 and ask for education enrollment.
