

{SOMobjects Developer Toolkit Workshop in NYC}

July 28, 1993

WHAT'S NEW: If you're coding applications in OS/2 or AIX environments, you won't want to miss this intensive 3-day lab class. You'll get an overview of the System Object Model (SOM) 2.0 and learn how to program with the frameworks provided with the toolkit.

ABOUT THE CLASS: Learn how to:

- * Build OS/2 and AIX object-oriented applications using SOM
- * Implement and use SOM classes in C or C++
- * Use and extend the SOM compiler and tools
- * Add persistence and replication capabilities to SOM objects
- * Construct a CORBA standard Object Request Broker with Distributed SOM

PREREQUISITES: You should have programming experience with C or C++ on an AIX or OS/2 platform, as well as knowledge of object-oriented concepts.

SCHEDULE: Date: August 16-18, 1993 City: New York City
Course Code: N1602 Tuition: \$1250

TO ENROLL: U.S. customers please call 1 800 IBM-TEACH.
