NOVFILES: Novell's Top Downloads

Novell's most popular files (top downloads) are not located in a library section of a Forum. They are accessible through a menu area called NOVFILES. Users desiring downloads from the NOVFILES area can enter "GO NOVFILES" at any CompuServe prompt, or from the NetWire main menu select "Service and Support", "Files, Patches, and Fixes", then "Top downloads (NOVFILES)". The NOVFILES area generally has about 10 files for download.
