

Ordering Information:

The System 7 Pack! is shareware—or try before you buy software—which means that you can freely distribute the System 7 Pack!, but that you have to pay the registration fee if you use it.

After 30 days, you must either pay us the registration fee, or delete all copies of the System 7 Pack! you have and remove all the enhancements made by the System 7 Pack! on your System.

Shareware is based on trust—authors rely completely on the honesty of their users. It is up to users like you to keep it alive. I put a lot of time and energy into the System 7 Pack! to make it the product it is today. I also spend a lot of time each day helping out users—registered and non-registered alike—by phone, email, and mail. It's hard work (especially as a full-time college student!), but the support from users all over the world (in over 25 countries) has more than made it worthwhile. I wouldn't give this up for anything in the world—and I plan to continue full-time after I graduate college.

Some users do not send in their fees thinking that others will send in their fees. But in reality, every user is kind of a barometer of everyone else. If you do not send in your fee, most likely, others will not send in their fees. If users do not send in their fees, shareware authors will stop producing quality software. We will all lose in the end if we do not support shareware. Besides, registration brings lots of great benefits that no self-respecting System 7 Pack! user would want to be without! :)

When I receive your registration for the System 7 Pack!, I'll send you a password to remove the restrictions in the System 7 Pack. You'll be able to add an unlimited number of links and use just about any key on your keyboard as a command key shortcut!

You'll also get a free copy of our new Instant System 7 Pack! You'll be able to install all the changes I've made to my own System by clicking on one button! The Instant System 7 Pack! does the rest.

But that's not all. You'll also receive a free copy of the System 7 Companion Pack! (a package of six great utilities for System 7 sold separately for \$25) and Biorythms! (sold separately for \$10).

Plus, you'll receive the latest Neat Stuff! Disk chock full of the latest versions of programs (including the latest version of the System 7 Pack!) from Insanely Great Software. You'll also find the latest issue of the MacSharewareCatalog on the disk. And as another thank you for registering the System 7 Pack!, we've thrown in a 10% coupon off your first order from the MacSharewareCatalog.
