- Lotus 1-2-3
  - Touchbase
- TrashMaster
- WordPerfect
- And Much, Much More!

You already know about the System 7 Pack! and Instant System 7 Pack! Now hear about all the other great programs in the IGS Mac Software Spectacular!

## System 7 Companion Pack!

Six great utilities for your Mac...

1. **QuickFinder**—easy to use (and Super Fast!) application launcher and mini-Finder!
2. **FKEY Master**—easy to use FKEY Manager that lets you install and manager FKEY programs.
3. **SuperFind**—Gives you the power to search by name, file type, creator. It's the power user's find utility!
4. **Alias--->Apple Menu**—Just drag any file over its icon and it will automatically create an alias and install it in the Apple Menu!
5. **SuperAlias**—Lets you create SuperAliases that can open multiple applications with a single click!
6. **MultiAlias**—An alternative to the Make Alias command that lets you specify the name and location of aliases that you create. And as the name suggests, you can do this with as many aliases as you'd like!

## Town Meeting Five Pack

**Town Meeting** is an innovative groupware program that allows you and other users to hold an electronic meeting on any Macintosh computer running System 7.

Features:

- 
- Easy to use. No training necessary!
- 
- Anonymous mode available—everyone says what they really think.
- 
- Meetings can be password restricted.
- 
- Private messaging available.
- 
- Meetings can be logged to a text file.
- 
- Server can run in background on any Mac running System 7. No dedicated Mac is required.
- 
- Server and Client applications are only about 35k each.

## File Sharing Toggle Five Pack:

Lets you turn File Sharing on and off with a click of the mouse—saving you long trips to the Sharing Setup control panel. By turning off File Sharing when you do not need it, you'll take a load off your System—saving memory and making it faster.

## AutoTrade Pro:

With the IGS Mac Software Spectacular You'll also get AutoTrade, our new investing program. We call it AutoTrade because it can actually manage an entire account. Lots of programs (at prices in the hundreds or thousands of dollars) tell you when to buy and when to sell, but very few tell you how much you should buy and how much you should sell! AutoTrade gives you buy and sell signals with actual dollar amounts—based on your account and diversification preferences! Whether you use AutoTrade to manage your entire account, just to help you with your own investing, or just for fun, AutoTrade will surely become one of your favorite programs on the Mac.

Plus you'll get Playin' Possum—a great prank program written by myself (and used with great success in high-school computing lab!) and a free copy of Play All Sounds!, which will play all the sounds on your Macintosh with a double-click of your mouse.

And as if that wasn't enough, we've decided to add 28 Megabytes of fully-featured demos of commercial software from leading publishers like Microsoft, Aldus, Adobe, Claris, as well as smaller publishers with innovative programs like Casady and Greene and Thought I Could.

That's 10 High Density Diskettes compressed to give you **28 Megabytes** of some of the best commercial software programs out there! From now on, you'll be able to try out products for yourself, without a pushy salesman over your shoulder. As a shareware author, I know that

there's nothing like trying before you buy. (And don't worry if your Mac can't read 1.4 meg disks, we can send you 800k disks instead for only an additional \$10 to cover the extra costs for copying and shipping and handling).

**How to order:**

IGS Mac Software Spectacular is only \$49.95 + \$5 s/h!
