Upgraders!

Version 3.4.1 is another free upgrade to the System 7 Pack! (All upgrades since 1.0 have been free!)

Just type in your old password into the Enter Password… menu item.

This version also supports the passwords from version 1.0x and 2.0x. Version 3.3 had a bug that made it reject the old passwords. It has been fixed in 3.4.1.

3.4.1 was released a few days after I released 3.4 due to a fix for a segmentation bug that caused 3.4 to hang on international System 7 versions.

Registered users of the System 7 Pack! and/or System 7 Companion Pack! can also upgrade to the IGS Mac Software Spectacular! for $25 + $5 s/h. I can only accept upgrade orders by mail. Just send a note that you are a registered user along with a check or money order made payable to Insanely Great Software.
