

Ordering Telemate

Telemate is NOT FREE. You MUST REGISTER after the 30-day evaluation period.

Telemate is a Shareware product. It is distributed through public access channels so that prospective buyers can have the opportunity to evaluate the product before making a decision to buy. If you decide to use this software, then you are under both legal and moral obligations to register it with the author. It is fully protected by State, Federal and International copyright laws.

To register your copy of Telemate, fill in the order form and mail it along with your cheque or money order in US or CAD funds to the address below. Because of the high service charge to collect cheques from overseas, we only accept overseas orders in the form of international money order. For credit card orders, please call our credit card RegSites.

When you register, you will receive the program diskettes with the latest version and your registration number. Registration entitles you to continue using the current version and all future versions. The registration number will remove any annoying functions in the unregistered version of all releases.

Please send cheque or money order payable to **White River Software** in US or CAD. Overseas order in money order only. (Note that the current postage from US to Canada is \$0.40.) For multi-user licenses, please contact us.
