

## **CH F-16 Combat Stick - Data file for Falcon4**

**The data file that's titled CHFalcon4.ptw, is based on the schematic in the diagram for the joystick.**

**Customer's can use this pre-programmed file to setup their joystick/throttle, but they must first go to the CHProducts website, and download the program Speedkeys, for use in WIN95. This program will create a CH Products directory where the data file should go.**

**This data file is only setup for the Combat Stick, all other CH joysticks/throttles should be setup using the Speedkey Programming tool.**

**If customers have any problems they can reach CH Products Tech Support at [tech@chproducts.com](mailto:tech@chproducts.com)**
