Audion" CD-ROM - Unique Computer Sounds

a complete compilation

600MB

computers

Clock

Collectible

Windows, and selected portions will even play on your audio CD player.

Clixsounds introduces "Audion,"

of original audio creations. Audion contains over

of sound files designed for use specifically on

as System Alert Beeps, StartUp Sounds, System

Sounds, Email Replacement Sounds, and

files. The CD-ROM is partitioned for Macintosh,

The Sounds

Audion provides both 16-bit/44.1kHz and 8-bit/22.5kHz versions of every sound included on the CD. All sounds in the Macintosh partition are in System 7 format, allowing instant listening by double-clicking the file.

Audion Includes:

StartUp Sounds

Audion contains over 35 System StartUp Sounds including classics, like the most popular downloadable sounds such as "Maniacintosh," "Legend of Macintosh," "Mystical Chant," "Seductive StartUp," "Haunted Macintosh," and other new sounds like . . .

Pure Power - for all fans of Power Macs, this sound is an intense collage of drums that climax to a crystal female "Power Macintosh!" preluded by an extreme "Can you feel it?"

Silence Is Boring - this file has a touch of techno that exclaims "Silence Is Boring!" ending with an explosive climax.

Prayer Of Power Macintosh - a powerhouse sound that begs the question of which computer God uses. He replies, thunderously.

Access Granted - a hi-tech, high-security sound complete with retinal scan and security code, an industrial intro to any Mac.

And more like: The Audion, Maniacintosh 2, HellHound, Congo, Digital Paradise, Planet Macintosh, Meditation, Heaven's Clouds, Entry Approved, and more.

Seductive Series - Audion includes 5 new sounds from the "Seductive" line of StartUps, all containing the breathy female voice from the popular "Seductive StartUp." New seductive sounds include "Dreamy Welcome," "Sensual StartUp," "Turn-on," "Ecstasy" and others.

Holiday StartUps - Audion also contains the seasonal "Holiday Series" for use as StartUp Sounds. Each Holiday sound includes a unique, fully-orchestrated style that adds a touch of spirit to your Mac during the Holidays. The "Holiday Series" includes beautiful, shortened renditions of classic carols like "Joy To the World," "Silent Night," "Silver Bells," and more, 7 in all.

System Alert Beeps

Audion includes over 150 unique System Alert Beeps, each available in both 16-bit/44.1kHz and 8-bit/22.5kHz stereo versions. The beeps range from 1 second up to 2.5 seconds and vary in style from extremely hi-tech, musical, mechanic, to natural. These are unique sounds in that they are not merely sound effects, but each contain excellent stereo effects and are of the highest clarity and fidelity.

System Clock Sounds

Audion includes 15 sets of sounds for use as your System Clock Sounds, which can play at 1/4 Past, 1/2 Past, 1/4 'Til, Top Of the Hour, and chime. Each set contains a sound for each function of the hour which is uniform with the theme of the set. The sounds can be used with the Date & Time Control Panel of System 7.5, or with the shareware "SuperClock" control panel.

System Clock Sounds Sets Include:

Grandfather Clock - a highly-requested set of clock sounds, this set contains pure samples of a grandfather clock that will allow your Mac to emulate its classic chiming melody.

Walky Talky - a unique set of sounds that simulate a voice via short-wave radio. "Quarter past the hour, over," "Half past the hour, Over," "Quarter 'Til the hour, over," and "Top of the hour, over and out!" The chime is in Morse code.

Rock-n-Roll - this set is a rockin' bunch of sounds for your clock, each made of a screaming lick on an electric guitar in the melody of a grandfather clock. The chime is a jammin' chord of distortion.

And other great sets, including "Alien Voice," "Rock-N-Roll Clock," "Male" and "Female Voices," and more !

Email Sound Replacements

Another feature of the Audion CD-ROM is the variety of sounds designed for email programs like Claris

Mailer and Eudora Pro. For programs like Eudora Light, which do not allow user-assigned sounds, Audion provides automatic sound replacers, which install the sound for you.

Email Sound Replacements include:

Professional Male and Female Voices - sounds for anyone looking for a straight-forward, professional type voice that announces the arrival of new mail.

Caribbean New Mail - a relaxing sound that takes you to a sandy paradise, announcing the arrival of a message in a bottle. A great match to the Digital Paradise StartUp!

RainForest Mail - a thunderous mail sound taking you to the tropics, full of splashing water and wild calls of tropical birds and animals.

And more, including "Hi-Tech," "Femalien," and "AirMail." 20 in all!

ollectibles

Audion includes collectible sounds from the "Star Battle" series, "Happy Birthday" sounds, and "Monster Macintosh Rally," to an entire collection of the "Holiday Series."

Star Battle - this series of sounds progresses with each sound file to make a continuing story. Audion includes several 30-second episodes that take the story to a new level and sound great when played in order.

Monster Macintosh Rally - an exciting new parody of the screaming monster-truck rally commercials aired on the radio full of blazing motors and yelling announcers saying "Be there!" This new sound is a 30-second file of pure butt-kicking, binary-breathing, number-crunching power of Macintosh proportion.

And more, including "Happy Birthday" versions, and Holiday Sounds.

tartUp Movies

Audion brings you several great digital animation clips that play automatically when you start your Mac. These 3D Quicktimes are short, 3-7 second clips that you place into your System Folder to be played while your extensions load, and each have stereo sound.

Included Movies include:

StereoMorph - a cool movie that morphs the letter M into A into C into I...etc to spell "Macintosh," as the entire word appears surprisingly at the conclusion.

Digital Entry - a futuristic "countdown to startup" movie whose numbers revolve, revealing a new number at each turn. Audio is included.

Thin Air StartUp - an exciting little clip that begins in darkness and suddenly reveals the word "Macintosh" one letter at a time, as the begin revolving from left to right. The audio follows the transition from left to right, creating a nice effect.

And more, 9 in all!

xtras

Audion also contains nearly 20 of the top audio-related shareware and freeware utilities available for Macintosh. Each utility performs helpful tasks that save valuable time when working with sounds and is available on the CD for your review for registration, if shareware. Audion also contains demos of various software of relevance, as well as a few "hidden" extras for the curious.

Ordering Info

Audion is available from Clixsounds for only \$34.95 and is shipped to you fully packaged and polywrapped in a jewel box complete with CD label and insert booklet.

***Holiday Special!** Order one copy of Audion at regular price and get additional copies as gifts for just \$19.95 each!

<http://www.edmondsun.com/clix/products/audion/>

Or

order by phone, FAX, or Snail Mail with order form.

allows you to assign

your Mac starts

when you empty your trash, another when you insert a disk, eject a disk, make a file copy, restart, shutdown....every function with a different sound. Your Mac can even tell you when it's the top of the hour, 1/4 past, 1/2 past, or 1/4 'til the hour, and even chime the count of the hour.

This Control Panel

a sound to play when

up, a different one

Clixsoundmaster is a full package that includes the Clixsoundmaster Control Panel, plus great sounds by Clixsounds to match the functions. With your order you receive Clixsoundmaster and your choice of one of three settings files:

- **STEREO SETTINGS**- these sounds are made to be played on stereo speakers or headphones, though neither are required. All of the sounds that come in this package are in stereo. Every sound file contains unique effects that take advantage of your stereo capabilities and will leave your fellow Mac-users jealous.

- **CYBER-SOUNDS**- add a futuristic sound to your Mac with these sounds. Sounds include a dark rumbling techno-type sound with a hi-tech female voice saying "Welcome...system StartUp has been initiated." Other sounds include great sci-fi atmospheres.

- **SEDUCTIVE SETTINGS**- personalize your Mac with a humorous, but sexy set of sounds with a breathy female voice. Each sound has unique, very sensual background sound as this female voice addresses you every time a function is performed on your Mac. A perfect settings choice for everyone who loves the 'seductive startups.'

Additional sets of sounds are just \$5. Sounds in each set are 8-bit, 22kHz samples. Each settings package comes with approximately 15 sounds designed and titled for easy setup to the functions for which they were designed.

System Requirements:

- Any Macintosh
- System 7 or greater
- 8MB of RAM or greater

Known Conflicts:

- Does not work well on systems using "Virtual RAM"
- Some functions may not perform when "Speed-" or "RamDoublor" is installed.
- If you have not had success in running the shareware "SoundMaster," CSM will not work on your system.
