Minutiae:

Available only in Europe.

This is the PIOs entry into the Amiga market. It is supplied with
pOS from proDAD, which spans the bridge to the Amiga world.

transAM can take only 3.3 volt EDO DIMMs. It does not support
interleaved memory.

Modular concept places system RAM, cache, CPU and control
circuitry on CPU module. Motherboard contains all I/O.

In addition to the Macintosh style ports, this machine also has 2 PC-
style game ports, a Centronics compatible parallel printer port, a
proprietary sound slot, MIDI in and out, and provision for an IR
remote control.

Supports both SCSI and EIDE drives.

Ships with PC-standard serial mouse and keyboard.
