

## Related Products

Having discovered Hummingbird™, you may be interested in some of my other programs. Here are two Shareware products that I'll include on the Hummingbird™ disk when I receive your order. Pay now, or evaluate them first, then if you like what you see, send the registration fee. Remember, I'm trying to bring you quality software at a modest price, please support Shareware.

## Guitar Tuner™ - \$12

**This program has over 1000 registered Shareware supporters!**

GuitarTuner™ listens while you tune and visually guides you through the tuning process. Out-performs hardware devices sold in music stores!

Big Package Deal! - \$29

The 'Big Package Deal' includes these virtual devices, \$12 each if purchased separately. They are similar to GuitarTuner but perform a variety of functions...

- Guitar Tuner
- Chromatic Tuner
- Bass Tuner
- Lab Meter
- Grand Staff Meter
- Wave Window

## WaveWindow™ - \$12

WaveWindow™ is a software oscilloscope. Very useful for anyone who works with sound on the Macintosh, educational and fun to play with. Several synchronization and display modes to chose from. Real-time.

Features...

- Resizable Window
- Color Preferences
- Focus Selection
- Snapshot to clipboard
- Pause Button
- Preferences Button
- Blazing-fast!
