heque

Cheque is an integrated program that keeps track of all your personal finances. The purpose of Cheque is to monitor your finances through your checking and savings accounts. One great thing about Cheque is that it combines five personal programs together to organize all your information.   It also includes an address book, a cash and budget organizer, and a program that will keep account of recurring entries. Cheque is a unique program with which to keep your budget well-organized.

hronomenon

Chronomenon is a software alarm clock and timer that crows, displays, and speaks user-supplied messages, and/or plays user-selected sounds, MIDI files, and movies when its alarm goes off. Chronomenon runs in the background and foreground, so the alarm can still be heard while running other software. Even if you shut down the computer and restart it before the alarm is programmed to sound, Chronomenon's alarm remains set. Other data, such as the message to be displayed and spoken as well as alarm time is saved.

inancial Tools

FIT DA's is a package of four desk accessories corresponding to the four menus of the application, which may be installed together or separately. It is recomended that you use the application version if you are running Multi-Finder,   because each DA significantly increases the size of the system heap.

.A.C.C

J.A.C.C is a digital calendar that allows you to enter and store notes. Just like a real calendar. All of these notes are stored in a datafile specified by selecting 'New',   from the File Menu to create a new one, or 'Open', to open an existing one. J.A.C.C recognizes Drag-and-Drop to allow you to drag any datafile from the Finder and drop it into the window.
