

ctiveDrag

ActiveDrag is a small system extension that will allow you to drag windows on your screen LIVE. That is, the window will actually move as you drag it. To run efficiently, this program must be copied to your Hard Drive.

Icoholics Anonymous

A stack authored by Pat with interface adjustments by Paul. This is a friendly tour through the basics of AA including 12 Steps, 12 Traditions, AA history, a short test on alcohol use and other related info. To run efficiently, this program must be copied to your Hard Drive.

nd the winning ticket...

And the Winning Ticket... allows raffle organizers to automate the drawing process for the contests and giveaways they coordinate. Simply enter the low ticket number and the high ticket number, and the program will calculate attendance and randomly draw tickets. The program is ideal for those who organize group meetings, trade shows, or any event where prizes are raffled off.

iskTracker

DiskTracker is an extremely powerful and flexible disk cataloging and management system. It combines a huge feature set with a really easy to use Mac-like interface. With DiskTracker, you can quickly and easily create a catalog of every file on every one of your floppy disks, hard drives, CD-ROMs, optical drives, servers, or whatever. Naturally, DiskTracker can read into StuffIt and Compact Pro archives and self-expanding applications.

earIt

This is a fantastic control panel for visually challenged individuals and anyone else that has a tough time reading small text. Once installed, you need only to select text and press the special command key. Presto, your Mac will speak the selected text. It's Mac magic. To run efficiently, this program must be copied to your Hard Drive.
