[What is Bubbles](#)

Bubbles is a game of logic. The task is easy but the way is hard.

Every turn five balls of eight different kinds appear on the game field at random. Each turn you can move one ball to any free position with one exception a ball can't jump over another one. Your task is to assemble five or more similar balls in a line in any direction. When you put the last ball in the line all balls in that line will disappear and you get a free turn. The score table in the tool window reflect's your current bonus. Your score is calculated by a complex rule, according to the number of turn's you took, number of extra balls and so on.

You can even make things worse and specify the timeout for a turn. When time is up and you didn't make a step the new set of balls will appear.

[System Requirement](#)

- MacOS 7.6.1 or higher. I didn't test it on MacOS early than MacOS 7.6.1 ;-)
- PPC processor.
- Color QuickDraw.

[Hints & Tips](#)

- You can use "Restart" button on the tool window to restart current game.
- You can use "Clear" button on the tool window to remove all records with score less than you specified from the score table.
- To delete a particular record from the record table drag and drop it onto Trash icon of the desktop. Note, The current player can not be removed.
- The translucent image shows which ball is dragging now.
- The available sizes of game field depend on the monitor resolution you have. You need at least 640x480 to play small game. To play medium size your monitor should have not less than 800x600. The 1024x768 monitor resolution is necessary if you wish play large game.
- Registered users can use "GameField Manager" from "Misc" menu to create own game fields.
- You can increase the number of balls which will appear every turn using the popup menu in the tool window.
- Move the ball's shadow to outside of the game window and release mouse button if you want to interrupt the moving of that ball and choose another one.
- The score table in the tool window shows all players of the current game field and it doesn't show other players.
- If you have doubt about the meaning of some buttons or controls use Balloon Help to clarify.

[World Wide Bubbles Competition](#)

You can participate in World Wide Bubbles Competition on WWW. To take part just fill out the entry form on

[<http://www.elegantsoft.com/Products/Bubbles/EntryForm.html>](http://www.elegantsoft.com/Products/Bubbles/EntryForm.html)

Drag your score record from Bubbles score table into third field of this form and fill rest of them manually. Pay attention, only registered users can participate in that competition.

[License](#)

Bubbles is 10\$ shareware. The save of score table and GameField Manager is locked. You have to register your copy of Bubbles to unlock all features. The register application comes with Bubbles or you can download it from:

[<http://www.elegantsoft.com/Support/Register/Register.html>](http://www.elegantsoft.com/Support/Register/Register.html)

See the file "How to register" for payment/registration details. Also, there is online registration form on:

[<http://order.kagi.com/?3SM>](http://order.kagi.com/?3SM)

[Disclaimer](#)

Under no circumstances shall the author be liable for any damage that result from the use or inability to use the software or related documentation.

[Distribution](#)

Bubbles may be copied and distributed freely for non-commercial use : on-line services (Internet archives, BBSs, etc.), magazine disks or CD-ROMS , etc., without the authors' permission, provided the charges levied are reasonable distribution or download costs. Prior to any commercial use explicit permission must be obtained from the author.

Support

Support is available via e-mail. You can send your questions and comments to:
