- **PC Magazine Shareware Award Winning Program (Nov 94)**
- **NautilusCD Multimedia Magazine High Five (Feb 94)**

- **America On-line Editors' Choice Best Pick (Nov 94)**

Overview and What's New

Seize The Day

Visual Day Planner is an easy to use application. If you know how to use a word processor, you already know how to use Visual Day Planner. You can enter text the way you do in a text editor, without worrying about relearning the program. You customize your days with **colors**, **bold** headings, *Italicize* the characters, underline important events, and even ~~strike-through~~ the tasks you have done. You can change the size you desire, or put in various effects of fonts. You can also combine all these effects like this **example**. Plus you can just drag and drop colorful icons from the picture bar straight into any part of your planner.

Visual Day Planner complies to common user interface, so you do not have to relearn all the keystrokes in order to use the application.

Visual Day Planner allows you to have an overview of month-at-a-glance style, or a closer look with weekly view, so that you can plan your schedules without flipping your appointment books back and forth. If you like to have a better view of what is happening on a particular day, simply double click the date of that day, Visual Day Planner will pull up a day view for you to examine.

Visual Day Planner is customizable. Don't like the default and dull black color of those fonts? Customize it your way. Want to look for a particular month and year? Use the "fast search" feature by double clicking on the month itself. Need to find a word? Use the "Find Word" facility. Takes too long for the calendar to load? Set the calendar as wallpaper!

You will find Visual Day Planner useful and amazed by how fast you can learn to use it effectively. I hope you will enjoy using Visual Day Planner. Don't forget to register if it proves to be productive to you.

License Agreement

Visual Day Planner is a [Shareware](#). It is not a free software, neither is it a public domain software. Non-Licensed users are granted a limited license to use Visual Day Planner on a 30 day trial basis for the purposes of determining whether Visual Day Planner is suitable for their needs. If the users decide to use Visual Day Planner after their 30 days trial period, they are required to register Visual Day Planner. The use of unlicensed copies of Visual Day Planner by any person or business without registering after the initial trial period is strictly prohibited. Registration entitles YOU to use Visual Day Planner.

Visual Day Planner is licensed on a per user basis. The license grants the user the right to install and use the software on one or more computers so long the total number of users does not exceed the license quantity.

You are encouraged to pass a copy of Visual Day Planner along to your friends for evaluation. Please encourage them to register their copy if they find it useful.

Registration Incentives

There are many ways to register Visual Day Planner. The registration fee is US\$29.95.

You are entitled to 30 days full evaluation of the program. Thereafter, some advanced features like printing or wallpaper setting will not be available to you. However, the basic functionality will remain. Your data will still be kept intact. The menu “Registration” will not appear in the registered version.

You’ll get a **major free upgrade** of Visual Day Planner, when available. A major upgrade is considered as a major increase in version number, say, version 7.0.

You will also get a one year free [Technical Support](#) directly from our company.

Special Internet Registration Bonus!

As an Internet registration incentive, we will send you a ***FREE CD-ROM**. (Shipping and handling Included)

*Note: Technical Support is provided free of charge for one year from date of registration.
FREE CD-ROM offer is only for Internet Registrations and valid till December 31st 1999

Register via Internet

We feature CyberCash, a real-time credit card authorization system. You will receive your registration code via e-mail after approval. You will be guided by the online Order Wizard for registration procedure.

The registration fee is **US\$29.95** for Visual Day Planner.

Special Internet Registration Bonus!

As an Internet registration incentive, we will send you a ***FREE CD-ROM**. (Shipping and handling Included)

Worth US\$19.95

This CD-ROM not only contain a backup copy of the program, we also included one of the best selections of Icons, Wallpapers, Fonts, Cliparts, and Desktop Themes.

To register via Internet, please set your Internet browser to our Website:

<http://www.inKlineGlobal.com/register/>

<http://www.inKlineGlobal.net/register/>

Alternatively, you can also select the menu item “Register Via Internet” by clicking on the menu item.

Any questions about the status of the shipment of the order, refunds, registration options, product details, technical support, volume discounts, dealer pricing, site licenses, etc., must be directed to the address listed at [Technical Support](#)

Note: Technical Support is provided free of charge for one year from date of registration.
*FREE CD-ROM offer is only for Internet Registration and valid till December 31st 1999.

Site license is available upon inquiry.

In order to qualify for volume discount, you MUST mail your check or Purchase Order to:

**inKline Global, Inc.
P.O. Box 5479
Reno NV 89513
USA**

or refer to the following section for credit card orders:

**[Ordering via Internet with Credit Card](#) or
[Toll-free ordering with Credit Card](#)**

Getting Started

There are two ways to get you started with Visual Day Planner:

1. Open the menu File | New
2. Click on the first picture on the toolbar 

When you are prompted with a dialog box, enter your desired new filename. Make sure you enter a valid filename with extension, the extension of the filename **must** end with **.MDB** to ensure compatibility with future versions.

Once a new planner has been created, you are ready to use the features:

1. Go to today's date (which is highlighted in red).
2. Click on the area below the date.
3. Enter text into the box provided.
4. Apply necessary font effects provided in the toolbar. Alternatively, you can also press Ctrl-A to pop up a font dialog.

Tips: When you click on a daily box, all [text attributes](#) and [text styles](#) applies to that particular box only.

Your box should look something like this now:

Actual screen may vary, depending on the resolution of your monitor. The above screen is snap-shot with a 1024 x 768 resolution monitor.

We strongly urge you to run Visual Day Planner at the resolution of at least 800x600. Please refer to your Microsoft (tm) Windows (R) 95 manual for more information about setting your monitor's resolution.

Tips: Double click on the date, a zoom view of today will be displayed.

Information Needed for Technical Support

1. Current version of Visual Day Planner you are using.
2. Your full name.
3. Please specify if you are a registered user to receive priority support.
4. EMAIL address if possible.
5. If it is a bug, describe the symptoms in as much details as possible.
6. Current Operating System:
 - a. Windows NT WorkStation
 - b. Windows NT Server
 - c. Windows 95/98
 - d. Unspecified Operating System

Installing/Uninstalling

Installing Visual Day Planner

All you need to do is to bring up your Explorer and click on the file SETUP.EXE. You will be prompted with a series of questions via our setup wizard.

Uninstalling Visual Day Planner

To uninstall Visual Day Planner, please follow the steps mentioned below:
(Please ensure that you have closed VDP)

1. Click on your “Start” menu
1. Select the folder Visual Day Planner
1. Select the icon labeled “Uninstall Visual Day Planner”

Please read [Disclaimer](#) before you proceed with uninstalling Visual Day Planner. Uninstall at your own risk.

About...

Visual Day Planner 6.2 for Microsoft Windows 95/98/NT
inKline Global, Inc.
Copyright © 1993-1999
All Rights Reserved.

Shareware

Shareware is a unique marketing method for software known as "Try Before You Buy". Shareware distribution gives users a chance to try software before buying it. If you try a Shareware program and continue using it, you are expected to register.

Copyright laws apply to both Shareware and commercial software, and the copyright holder retains all rights, with a few specific exceptions as stated below. Shareware authors are accomplished programmers, just like commercial authors, and the programs are of comparable quality. (In both cases, there are good programs and bad ones!) The main difference is in the method of distribution. The author specifically grants the right to copy and distribute the software, either to all and sundry or to a specific group. For example, some authors require written permission before a commercial disk vendor may copy their Shareware.

Shareware is a distribution method, not a type of software. You should find software that suits your needs and pocketbook, whether it's commercial or Shareware. The Shareware system makes fitting your needs easier, because you can try before you buy. And because the overhead is low, prices are low also. Shareware has the ultimate money-back guarantee -- if you don't use the product, you don't pay for it.

Disclaimer

Users of Visual Day Planner must accept this disclaimer of warranty:

VISUAL DAY PLANNER IS PROVIDED "AS IS" WITHOUT WARRANTY OF ANY KIND. INKLINE GLOBAL, INC. FURTHER DISCLAIMS ALL IMPLIED WARRANTIES INCLUDING WITHOUT LIMITATION ANY IMPLIED WARRANTIES OF MERCHANTABILITY OR OF FITNESS FOR A PARTICULAR PURPOSE. THE ENTIRE RISK ARISING OUT OF THE USE OR PERFORMANCE OF THE SOFTWARE AND DOCUMENTATION REMAINS WITH YOU.

IN NO EVENT SHALL INKLINE GLOBAL, INC. OR ANYONE ELSE INVOLVED IN THE CREATION, PRODUCTION, OR DELIVERY OF THE SOFTWARE BE LIABLE FOR ANY DAMAGES WHATSOEVER (INCLUDING, WITHOUT LIMITATION, DAMAGES FOR LOSS OF BUSINESS PROFITS, BUSINESS INTERRUPTION, LOSS OF BUSINESS INFORMATION, OR OTHER PECUNIARY LOSS) ARISING OUT OF THE USE OF OR INABILITY TO USE THE SOFTWARE OR DOCUMENTATION, EVEN IF INKLINE GLOBAL, INC HAS BEEN ADVISED OF THE POSSIBILITY OF SUCH DAMAGES.

New Planner

Shortcut Key: Ctrl-N

There are two ways to get you started with Visual Day Planner:

1. Open the menu File | New
2. Click on the first picture on the toolbar

Visual Day Planner will display a dialog box and prompt you for a filename. When a new filename is entered, Visual Day Planner will create a database file.

After creating a planner, you can go ahead and use Visual Day Planner. Please refer to [Getting Started](#) for more details.

At this point, you will be prompted with an “Open As ... “ dialog box with 2 options:

1. Open As Personal Planner
2. Open As [Shared Workgroup Planner \(Network\)](#)

If you are the sole user of the program, you should choose the option “Open As Personal Planner.”
“Open As [Shared Workgroup Planner \(Network\)](#) is meant to share database among a group of users.

To avoid being prompted for this option, users can set options in [Autoload File](#)

Open Planner

Shortcut Key: Ctrl-O

There are two ways to retrieve an existing planner:

1. Open the menu File | Open
2. Click on the second picture on the toolbar

Visual Day Planner will display any existing **.MDB** files in a dialog box. If your planner file is not found in the current directory, change to a desired directory. The default directory for Visual Day Planner to search for a **.MDB** file is the directory of VDP.EXE

At this point, you will be prompted with an “Open As ... “ dialog box with 2 options:

1. Open As Personal Planner
2. Open As [Shared Workgroup Planner \(Network\)](#)

If you are the sole user of the program, you should choose the option “Open As Personal Planner.”
“Open As [Shared Workgroup Planner \(Network\)](#)” is meant to share database among a group of users.

To avoid being prompted for this option, users can set options in [Autoload File](#)

Save Planner

Visual Day Planner now saves your data automatically when a view is changed, when users choose to advance the current month to an earlier or later date.

This option is not available when you open the planner to be shared across the network.

Page Setup

This command will prepare the look of a printed calendar.

Margins

The print margin of a calendar defines the offset edge of a paper. Usually a laser printer has a narrow margin and thus have the ability to print a larger calendar on a given paper size (usually 0.25" to 0.50")
Dot matrix printer needs a wider margin (usually 0.50" to 1.00")

The default is 0.50" (or 0,50" depending on the delimiter you are using for your decimal point)

Header

The title of the calendar. You can change the [text attributes](#) or [text styles](#) of the title and get a true What You See Is What You Get (WYSIWYG) calendar printing.

Tips: You might want to experiment with your printer a little to find the best set of margins. Once the margins are set, they will be saved automatically and you don't have to re-adjust every time you need to print another calendar.

Print Setup

This command prepares the printer for calendar printing. The dialog box varies among different printers. Please refer to your printer's manual for more information regarding the print options.

Tips: In order to print the best quality calendar, "Landscape" print setup is highly recommended.

Print

Shortcut Key: Sidebar button

This command prints a high quality, true What You See Is What You Get (WYSIWYG) calendar utilizing the fonts found in individual [daily cell](#)

The print command also supports COLOR calendar printing if your printer is color capable.

Users please note regarding a potential print problem. If the program crashes with “Overflow” error, please check the following:

Delimiter For Decimal Point

Your delimiter for decimal point should be “comma” (e.g. 1,50) if your country’s setting is one of the followings:

- Austria
- Belgium (Dutch)
- Belgium (French)
- Brazil
- Canada (French)
- Denmark
- Finland
- France
- Germany
- Iceland
- Italy
- Netherlands
- Norway
- Portugal
- Spain
- Sweden

The following countries should be using either “period” or “full-stop” (e.g. 1.50) if your country’s setting is:

- Australia
- Canada (English)
- Ireland
- Mexico
- New Zealand
- South Korea
- Taiwan
- United Kingdom
- United States

If your country listing is not mentioned above, it is always safest to use the default supplied comma delimiter recommended by Microsoft Windows default settings.

Set Wallpaper

The wallpaper setting command will set a background wallpaper. The file is saved in bitmap format (.BMP) in your current Visual Day Planner executable directory (i.e. where VDP.EXE resides). The file is

saved as FILENAME.BMP where FILENAME is the name of your current planner.

Tips: You can take advantage of this wallpaper setting feature to avoid loading Visual Day Planner in most cases. You can also have an automatic update during exit.

Clear Wallpaper

This command will clear any wallpaper settings in the windows background. This command will not restore your previous wallpaper, to restore, please refer to [Previous Wallpaper](#)

Update Wallpaper (Network)

If you are using Microsoft Windows 95/98 or NT with networking(TM), you can use this command to share wallpapers with your colleagues within the same workgroup network. Simply use Control Panel's "Desktop" icon to modify the path of the wallpaper, i.e., all the paths pointing to one central location (e.g. e://yourservername/vcp/group.bmp). **Update Wallpaper** will actually update the changed wallpaper from the central location without modifying the shared wallpaper.

For more information about Control Panel, Desktop icon and wallpaper settings in Windows, please refer to your Microsoft Windows User Manual.

Previous Wallpaper

This command will restore the previous wallpaper setting. Only one level of undo is allowed for this command. If you repeatedly call the command "Set Wallpaper", then this command will only restore previous Visual Day Planner wallpaper, not the historical wallpaper you have set in Windows.

Wallpaper Option

There are two functions provided for this command:

Wallpaper Setting

Wallpaper snapshot can be either normal, maximized or stretched. Normal size is actually the original size of what you see on the actual calendar. Full size is an enlarged bitmap that covers the whole screen.

Automatic Update

This function is provided so that the wallpaper will be updated automatically when you exit Visual Day Planner. Be sure to cross the checkbox if you want to update your calendar automatically.

Exit

Shortcut Key: Alt-F,X

To close Visual Day Planner, use File | Exit

 **Cut**

Shortcut Key: Ctrl-X or Rightmouse Button

You can cut any text from any [daily cell](#). Before cutting any text, you have to highlight the text using the mouse or the keyboard. Any cut text will be placed in Microsoft Window's clipboard.

Copy

Shortcut Key: Ctrl-C or or Rightmouse Button

Tips: Use drag and drop to copy and paste between cells

You can copy any text from any [daily cell](#). Before you copy any text, you have to highlight the text using the mouse or the keyboard. Any copied text will be placed in Microsoft Window's clipboard.

Paste

Shortcut Key: Ctrl-V or or Rightmouse Button

Tips: Use drag and drop to copy and paste between cells

You can paste any text from the clipboard into any [daily cell](#). Any previous [text attributes](#) and [text styles](#) will be applied to the daily cell where you paste your text.

Refresh (Network)

Note: This command will only be enabled (and thus the sidebar button picture is visible) if you open the planner as [Shared Workgroup Planner \(Network\)](#). As the name implies, **refresh** will display the latest data from the central database shared among your workgroup. For example, when a user modifies a particular day for a particular month, your planner will not display the latest information until you select this command.

In v6.1 Network users have the option to automatically refresh the planner after a certain period of time. (Use the “Customize” menu “Network Option” item.)

A “**Read Only**” Client is now available. (All editing and saving options disabled.)

Lock/Edit (Network)

Note: This command will only be enabled (and thus the sidebar button picture is visible) if you open the planner as [Shared Workgroup Planner \(Network\)](#). A user is required to lock/edit a particular day before the data in that particular day is to be modified.

To lock/edit a particular day, simply click on the desired day, then click on the lock/edit button (or select the menu command **Lock/Edit (Network)**). Once a lock/edit is placed, you have the exclusive right to add, modify or delete the data on that particular day. No one else will be able to lock/edit the same day unless the lock/edit is freed when you are done. During the locked period, other users can still perform similar locks/edits on other days, [Refresh](#) their database, move to other months, switch to different views etc. without being affected. If a user attempts to lock/edit a day that has been locked, a message box will pop up telling this user “so-and-so has locked the day on so-and-so machine.”

When you are done with modifying a day, please remember to **unlock** so that other users will have write access to the day you have placed a lock/edit on.

In v6.1, network users have the option to automatically unlock the day after a period of inactivity. (Refer to the “Customize” menu “Network Option” item.)

A “**Read Only**” Client is now available. (All editing and saving options disabled.)

Tips: You can automatically lock/edit the cell by going into [daily cell](#).

Zoom View/Edit

Shortcut Mouse Click: Double click on a daily cell's date

The Zoom View/Edit feature allows you to have a broader/deeper view of a [daily cell](#). Enter or manipulate text in the Zoom View/Edit cell the same way in a daily cell.

Click "Ok" button when you are done making changes to your Zoom View/Edit box. All changes will be reflected in the [daily cell](#).

Click "Cancel" button if you don't want to make any changes.

Click "Fonts" button if you want to apply font effects like [text attributes](#) or [text styles](#).

If you're sharing your planner among others, selecting this command will actually lock/edit the selected cell automatically

Date Difference

This event will provide you a difference in days, weeks or months between 2 dates. Simply enter the start date when you choose to customize, then select the “Show” submenu or click on the Date Difference icon . Next, simply position your mouse pointer at a daily cell and a small window will pop-up showing the difference between 2 dates.

View Command

There are 3 view commands available:

Month View

View and edit a monthly calendar. This mode gives you a general overview of a month.

Week View

In order to switch to a specific week view, click on the [daily cell](#) of a month view calendar followed by this command.

Day View

Please see [Zoom View/Edit](#) for more information

Find Word

Shortcut Key: Ctrl-F

This command will search for a specified string of characters from the beginning of the calendar. The found string will be highlighted. Make sure you move the "Find Word" window around to uncover the found word which is sometimes hidden behind the window.

Tips: To narrow down a word or string search, please be as specific as possible.

Previous Month

There are two ways to bring you to the previous month:

1. Open the menu Goto | Previous Month
2. Click on the picture 

Tips: Any changes made to the current month will be saved automatically.

Current Month

Shortcut Key: F5

You can also use the menu Goto | "present month, present year"

Use this feature to bring you back to the present month.

Next Month

There are two ways to bring you to the next month:

1. Open the menu Goto | Next Month
2. Click on the picture 

Tips: Any changes made to the current month will be saved automatically.

Fast Search

Shortcut Key: F3

Shortcut Mouse Click: Double click on the panel displaying month

Use this feature to bring you to a desired monthly view. Fast Search allows you to search between the year 1990 and 2009.

Tips: Any changes made to the current month will be saved automatically before displaying the desired selection.

Bold

Shortcut Key: Ctrl-B or Rightmouse Button

This will apply a bold [text attributes](#) to a [daily cell](#).

Italic

Shortcut Key: Ctrl-I or Rightmouse Button

This will apply an italic text attributes to a daily cell.

Underline

Shortcut Key: Ctrl-U or Rightmouse Button

This will apply an underline text attributes to a daily cell.

Strike Through

Shortcut Key: Ctrl-T or Rightmouse Button

This will apply a strike-through [text attributes](#) to a [daily cell](#).

Color, Size, Fonts

Shortcut Key: Ctrl-A or Rightmouse Button

This dialog box comes in handy when you want to apply all [text attributes](#) and [text styles](#) to a particular [daily cell](#).

Initial Font

You can set your desired font type, color and size to be your default font when Visual Day Planner loads. Once defined, Visual Day Planner will load the default font every time during startup.

Daily Appearance

To display the Daily Appearance dialog box, use the menu Customize | Daily Appearance.

This command will change the appearance of your [daily cell](#) looks. There are currently three different appearances of a cell, **daily**, **today** and **memo**. You can customize each of them. To customize anyone of the appearances, simply click anywhere in the [daily cell](#), a dialog will appear to prompt you for changes to be made.

Tips: Try to use 12 points or smaller font size because a font size too big will be hidden partially.

Monthly Appearance

To display the Monthly Appearance dialog box, use the menu Customize | Monthly Appearance.

This command will change the appearance of your month display which is found at the bottom of Visual Day Planner. To customize the appearance of the month, simply click at the panel displaying the month. A dialog box will prompt you for changes to be made.

Day of Week Appearance

Shortcut Mouse Click: Double click on individual weekday (i.e. Sun, Mon... etc) panel on the screen

This command will change the appearance of your weekdays or weekends or both.

Autoload File

To display the Autoload File dialog box, use the menu Customize | Autoload File.

A box will display the filename and filepath of your planner file if it exists. Simply check the check-box provided to autoload the current planner when you start up Visual Day Planner. Uncheck the check-box if you do not want to autoload any planner.

You are also required to select one of the following autoload method:

1. Open As [Personal Planner](#)
2. Open As [Shared Workgroup Planner \(Network\)](#)

You are also prompted an option to load the "Month" view or "Week" view when you initially start up Visual Day Planner.

Minimize during Startup: Visual Day Planner will startup minimized if you select this option.

Tips: Generally "Week" view provides a faster load time compared to "Month" view.

Registration Code

There are three input box to fill in:

1. User Name
2. User Company
3. Registration code

When you register your copy of Visual Day Planner, we will send you a registration code. Registration will remove the Registration Reminder Screen. Furthermore, registration will customize your copy of Visual Day Planner. Your name and company will show up when you start up Visual Day Planner.

Please read [Registrations & Incentives](#) for more information.

Text Color 

Apply one of the sixteen predefined color to a daily cell. This command will only affect the highlighted word or sentence in a cell.

Text Size

The range of a font size is valid from 4 to 20.

Apply one of the predefined font sizes to a [daily cell](#). This command will only affect the highlighted word or sentence in a cell.

Text Fonts

Apply one of the predefined fonts to a [daily cell](#). This command will only affect the highlighted word or sentence in a cell.

This command will show you any True Type fonts in your system.

Association of Shareware Professionals

ASP Ombudsman Statement

This program is produced by a member of the Association of Shareware Professionals (ASP). ASP wants to make sure that the shareware principle works for you. If you are unable to resolve a shareware-related problem with an ASP member by contacting the member directly, ASP may be able to help. The ASP Ombudsman can help you resolve a dispute or problem with an ASP member, but does not provide technical support for members' products. Please write to the ASP Ombudsman at 545 Grover Road, Muskegon, MI 49442 USA or send a CompuServe message via CompuServe Mail to ASP Ombudsman 70007,3536.

Recurring Event

Adding An Event

This function allows you to set repeating events on a calendar. Multiple recurring events can be set on the same days. For example, a user may wish to view a particular television program every Saturday night, he/she can use this function to set a repeating event as a reminder. To set a recurring event, a user is advised take the following sequence:

1. Enter a start date
2. Enter an end date
3. Specify the recurring method, whether is it every day, week, month or year

Once all the required information is entered and selected, this event will automatically figure out the appropriate dates and enter the information into a daily cell with no user input.

Note: If you choose the last day of a month for a recurring event, this function will assume similar action to be taken for the rest of the months until the end date. For example, if a user chose to set an event on May 31st till September 30th, then the last day of the month will contain the event instead of skipping months without a 31st.

Deleting An Event

Deleting an event is easy. Simply browse through the events using the browse button and click on the “Delete” button, a recurring event with the specified date and text will be removed from the calendar.

Workgroup Recurring Event Settings

Workgroup users sharing a database across the network will not be able to set a global recurring event for the workgroup unless you have exclusiveness to the database, i.e. no one else is accessing the database at the time you open the shared database. To ensure exclusiveness, you need to open the database as a **Personal Planner**. The program will prompt with the following message if you attempt to open the shared database exclusively but someone else is accessing it:

“You attempted to open a database that is already opened exclusively by user ‘[user name]’ on machine ‘[machine name]’. Try again when the database is available.”

Alarm Event

A user can set one or more alarm events per day. A unique musical tune (if non-silence option is chosen) and a dialog box will pop up to alert the user at the specified time.

Add An Alarm Event

Click on the alarm icon shown on the sidebar. If a user selects a daily cell followed by the alarm icon, the specified cell's date is pre-filled. Otherwise user will have to fill in the dates. You will not be able to browse an alarm event in this case. In order to "browse" and "delete" an alarm event, please refer to the paragraph **Browse/Edit An Alarm Event** mentioned below.

Musical Tunes

Visual Day Planner supports playing either MIDI files (file extension is .MID) or WAV files (file extension is .WAV)

Visual Day Planner searches the directory C:\WINDOWS\MEDIA (or the directory of your installed Windows 95/98 + \MEDIA, e.g. C:\WIN95\MEDIA) for the presence of musical tunes.

Adding Musical Tunes

Simply put any MIDI or WAV files in your C:\WINDOWS\MEDIA directory and Visual Day Planner will automatically recognize the presence of the newly added musical tunes. This is the default directory for any musical media that Microsoft recommends.

Browse/Edit An Alarm Event

After adding an alarm event, a small alarm icon will show up in the daily cell. In order to edit/delete an alarm event, simply click on the small alarm icon which resides in the top-right corner of the cell.

This command will allow you to browse through all available alarm event for the particular day. If you decide to delete a specific alarm event, simply click on the "Delete" button. Note that a deleted alarm event cannot be recovered.

Workgroup Alarm Settings

Workgroup users sharing a database across the network will not be able to set an alarm for the workgroup unless you have exclusiveness to the database, i.e. no one else is accessing the database at the time you open the shared database. To ensure exclusiveness, you need to open the database as a ***Personal Planner***. The program will prompt with the following message if you attempt to open the shared database exclusively but someone else is accessing it:

"You attempted to open a database that is already opened exclusively by user '[user name]' on machine '[machine name]'. Try again when the database is available."

Pictures

Select a picture, then drag and drop it into your planner. That's all!

Add your own icons and customize the picture bar! Just open your windows explorer and drag and drop Icon (*.ico) files into the picture bar. Click the "Reload" button to refresh the picture bar.

Alternatively, you can copy or move icon files into the "icons" directory located in the program folder. The new icons will show up the next time you start up Visual Day Planner or when you click the "reload" button.

Shared Workgroup Planner

A planner that can be shared across the network among multiple users. For example, there are 3 persons in a workgroup and all of them can share the same planner, including, but not limited to, adding, deleting and modifying data.

All users in the workgroup will have full read access to the planner. To add, modify or delete data, a user is required to lock/edit the desired day so that no one else can modify that day at the same time. However, read, modify and write accesses apply to other days.

New: A “**Read Only**” Client is now available. (All editing and saving options disabled.)

Other Products by inKline Global, Inc.

Stay Connected! for Windows 95/98/NT

Unlimited Internet Access? Not!

Many netizens, including myself, subscribe to a so-called “Unlimited Internet Access” modem dial-up plan provided by many local or national Internet Service Providers (ISP). However, such advertisement is misleading. Every time when I leave my modem connection unattended for a certain period (roughly 15 minutes) and walked away from my computer, the moment when I was back to my desk to get ready to surf the net, I found that the modem connection is dropped. Bad phone-line? Maybe, but how it occur so frequently with such a consistent timing?

I decided to find out what has actually gone wrong with my phone line by experimenting with extended period of non-stop net surfing. To my amazement, never once I had a bad phone-line connection.

Another problem is even more irritating to me: trying to dial-up my ISP just to get a repeated busy modem signal. Once I got a connection, I don't want to be disconnected. Ok I'm selfish, but I've already paid my subscription fee!

The Truth Is:

Ok, it's time to check the Internet newsgroup for such weird behavior. After posting a mail to the newsgroup, I got a few responses. Many told me this was not the fault of my phone line though sometimes it might happen. The problem is mainly due to my Internet Service Provider (ISP). They have limited modem port, ranging from a ratio of 1:20 to 1:40, i.e. 1 modem serves 20 to 40 subscribers. During the peak hours, many subscribers have extreme difficulties trying to get connected: either the line is busy, or the TCP/IP protocol is not being established even after being connected.

Remedies

Now I got the whole picture. Immediately I thought about remedies. A sudden inspiration came to me one night: why not write a "hassle-free" program, place it in the startup folder every time the computer starts, and have it automatically placed in the taskbar (or tray notification area)? Spice it up with some animation to tell me the status of the connection, I'll never have to see a dropped modem connection anymore! I can now surf with impunity with the utility working in the background to ensure I never lose a connection.

I have tested the program countless times running continuously for more than 24 hours without a dropped connection. Of course this program will not help if a bad phone line occurs or if you lose power, but this is rare, according to my experience. A beta tester Michael Chu (e-mail him at mikelchu@ix.netcom.com) reported a record of 215 hours of continuous online time!

I hope that you find this utility as useful as I do. You can visit our website at <http://www.inKlineGlobal.com> for a trial copy. Enjoy!
