The Holy Bible for Windows is, as you guessed it, a Windows 3.1 Help file. It is released as shareware and can be used for 30 days free of charge. After that, I would appreciate **\$30.00** to register this program. There is a registration form that you can print out by selecting Info and then Registration at the top menu of the Help file. If I get enough registered users, I will consider adding new features like a Concordance and Biblical Dictionary. Registration will also allow me to notify you of upcoming and updated versions.
