Lawyer Jokes

The jokes in this collection (lawjok.dat) were obtained from a public domain source, compiled by Tim Dees (CIS 73240,1237), and used with his permission. I wrote the joke viewer program so I could see a joke selected at random every time I boot up my computer and run Windows. If you like the program, please register (and keep the shareware coming)!

Installation

Copy the LAWJOK.EXE and LAWJOK.DAT files to a directory on your hard drive. The dynamic link library VBRUN300.DLL should be in your Windows \ SYSTEM directory. You may obtain VBRUN300.DLL from the CompuServe WINSHARE forum library as VBRUN3.ZIP.

You may install *Lawyer-Joke-a-Day* as an icon in your Program Manager in the usual manner (File, New, Browse). Creating the icon in your startup group will let you see a new joke every time you run Windows.

Using the Program

From the File menu you can print the current joke or request a new joke. From the Edit menu, you can copy the current Joke to the clipboard. For example, you might want to e-mail a joke to a friend on your local area network by pasting it into your Windows e-mail editor.

If there are any features you would like to see in future versions of this software, or if you find a bug or have any other comment, please contact me at the following address:

Ivory Tower Software

Torrance, CA 90504

You may also send me a message via **CompuServe** (76427,2611). If you are reporting a bug, please mention the version number.

Lawyer-Joke-a-Day is shareware. That means that you can evaluate this program before you purchase a license (register). You may also copy the evaluation version for distribution to others for their evaluations. To keep using *Lawyer-Joke-a-Day* after your evaluation is complete you must register. For a copy of the latest version and a single license to use the software on any machine, send \$10 to **Ivory Tower Software** at the above address.

History

Vers.	Date	Description
1.01	27-July-93	First shareware version.
1.02	7-Aug-93	Fixes typos and adds a joke in the data file. Slightly more efficiency in printing an order form with better error trapping.
1.03	4-Oct-93	Adds sound support for registered users.
