

Thanks to everyone who beta-tested or otherwise helped out!

The following people deserve extra credit:

Jon Arnason

Chris Denes

Matt Holliman
mattholl@imsa.edu

August Jackson
phantom@imsa.edu

Theresa Levy
talevy@romulus.rutgers.edu

Jet-Sun Lin
jet@imsa.edu

Soochon Radee
radee@imsa.edu

Dan Streufert
dans@imsa.edu

*(Michael Kim can be contacted through
the Internet as "mkim@imsa.edu.")*

Also, thanks to:

The Illinois Mathematics and Science Academy
The University of Chicago
The Members of IMSAMUG

"Polaris? Alpha Ursa Minoris?"

"Dragon? What dragon? Nobody here but us stars..."

"My God! It's full of stars!"

“Stars! In their multitudes!”

*“Little white dots in the sky at night.
Lots of 'em. Everywhere!”*

“Be my North Star and I will follow you...”

...and finally:

*“star (star) 1. n. any of a vast number of hot, usually
luminous celestial bodies, consisting of matter comprising
most of the known elements in varying percentages in a
highly ionê state, and found distributed in galaxies
throughout the known universe...”*
