Cogent EM960 PCI Ethernet Adapter

Connection Type:

[AUTOSENSE](#)
[THICK/THIN](#)
[UTP](#)
[UTP/Full Duplex](#)
[UTP/Link Disabled](#)

For Help on Help, Press F1

AUTOSENSE

Indicates that the EM960 PCI adapter will automatically detect the cable type if there is a cable connection. **AUTOSENSE** does not detect Full Duplex Ethernet(FDE). This is the default network interface parameter.

THICK/THIN

Overrides the physical media link configuration and sets the cable type to THICK(AUI) or THIN(BNC) depending on the connection's cable type.

UTP

Overrides the physical media link configuration and sets the adapter's cable type to twisted pair.

UTP/Full Duplex

Enables Full Duplex Ethernet on twisted pair cabling.

UTP/Link Disabled

Specifies twisted pair cabling with Link Integrity disabled for older hubs.
