

Basic Operations

- (1) Use the left button to drag the clock.
- (2) Click the right button to exit program.
- (3) Double click the left button to display setting dialogbox.

Sound

Chime and alarm can be played using a sound file (extension:wav). It requires a hardware (small speaker) and a driver for playing sounds.

Color

When you select 256 color setting, it may cause a conflict between the applications for color palette. To reset **Emi Clock** color, just click the Clock with the left button of the mouse.

To reduce CPU burden

Emi Clock is basically tuned on 486DX4 100MHz. If you feel slow in executing applications, do not display the second hand.

Copy

You may make copies of the original Software. But, you may not modify, transrate, merge, disassemble, or de-compile the Software nor attempt to reverse engineer the source code of the Software.
