### **GIF Construction Set for Windows 1.0j**

*GIF Construction Set for Windows* is a powerful collection of tools to work with multiple-block GIF files. It will allow you to assemble GIF files containing image blocks, plain text blocks, comment blocks and control blocks. It includes facilities to manage palettes and merge multiple GIF files together. It will make the extensions of the GIF specification work for you. Among its other functions, *GIF Construction Set for Windows* can:

- Create Netscape looped animations.
- Create interlaced GIF files.
- Create transparent GIF files.
- Add, edit and delete comment blocks.
- Add non-destructive text to images as plain text blocks.
- Create multiple-image GIF files.
- Serve as a fully-compliant Windows GIF viewer application.
- Be a GIF viewer "helper" application for a World Wide Web browser or Mosaic client.

New features in this release include:

- Multiple image import.
- Image block titles.
- Improved dithering.
- Looping for Netscape-based web pages
- True transparency
- Remember last directory
- Export to single-image files
- Improved colour selection for transparent GIF files.
- Real time interlace display.
- Ready for Windows 95.

*GIF Construction Set for Windows* requires a minimum of four megabytes of memory to run reliably, with eight megabytes preferable. Larger images may require more memory still.
