ctmixerSetOutputGain

ctmixerSetOutputGain(long nMixerID, long nLeftGain, long nRightGain)

Parameters:

<i>nMixerID</i>	Identifier of the mixer to be adjusted. It must be a value between 0 and <code>ctmixerGetNumberOfMixers()</code> - 1.
<i>nLeftGain</i>	Gain for the left channel, in decibels. It must be a value between -10 and 10.
<i>nRightGain</i>	Gain for the right channel, in decibels. It must be a value between -10 and 10.

Return Value:

0 if successful, -1 if an error occurred. The error code can be obtained by calling `ctmixerGetError()`.

ctmixerSetAGC

ctmixerSetAGC(long nMixerID, BOOL bAGCOn)

Parameters:

nMixerID The mixer ID to be set. It must be a valid mixer ID as returned by `ctmixerGetNumberOfMixers()`.

bAGCOn A Boolean value indicating whether AGC is to be turned on (`TRUE`) or off (`FALSE`).

Return Value:

The function returns `TRUE` if the mixer ID is valid and AGC is successfully set, and `FALSE` otherwise.
