1.2 Copyrights and distribution

This program is subordinated to Standard~Amiga~FD~Software~Copyright~Note.

This program is FreeWare, which is specifird in item ~4a~.

For more information you should read AFD-COPYRIGHT (version 1 or newer).

```
~Copyright~~~~~  
~Distribution~~~~  
~Disclaimer~~~~~  
~Return~Service~~
```

1.3 Introduction

I wrote this program, because I need to now, what is the Ascii code of key from keyboard, which I pressed. Maybe this little program will be of some use for You

1.4 Instructions

Program runs both from CLI or Workbench. It does not need any argumends. When you start my program, first you see window with informations about it. If you press any key (or ouse clicked on this window), you see new window with tables:

```
Visable Code  
Decimal Code  
Hexadecimal Code
```

bellow You will see frame, when you can see information, if this kay is RAWKEY, or VANILLAKEY.

1.5 System requirements

It was tested on this machine:

```
Amiga 1200, KS3.0,
```

```
Amiga 1200 + BLIZZARD - IV 1230 + 8MB ram
```

```
Program presents the best on WBenchScreen with Dimensions 640x512
```

1.6 Future

I think, this program does not need any new versions. If You ↔
think
otherwise, you can contact with
me.

1.7 History of the program

version 1.0	22.04.1997	o First public version.
version 1.21	25.05.1997	o some cosmetics changes

1.8 Other informations
