TIPS

Finding your way on board a ship is a hard task. Fortunately, Tom is fluent in Russian. During the game, just aim at the signs painted on the walls near doors to get a translation and locate your position.

This is a spoiler-free walkthrough. It only gives you the ideal path to complete the objectives in the game. It does not tell about items locations, special events, encounters etc...

As a reminder, on a ship:

- The right side is called *starboard*.
- The left side is *port*.
- The front of the ship is the *prow*.
- The rear part is called the *stern*
