

Best of Photography, Two-Volume Set

In this special collection you'll find underwater shots capturing the beauty of ocean life; land shots of such breathtaking natural wonders as Mt. Rainier, Niagara Falls, and the San Bernadino National Forest; historical photographs direct from NASA, countryside photos of barns and churches; relaxing beach water scenes; uniquely created imagery of musical instruments and silk patterns; and more.

The over 100 photographs in this two-volume set have been specially selected because of their unique expression or cultural and historical significance. They are available for your free, non-commercial use and are ideal for those interested in digital photography and desktop publishing.

All photographs in this set have been saved in multiple formats. Mac users will find the photographs in 24-bit TIFF and 8-bit PICT formats. PC users will find the photographs in 24-bit TIF, 8-bit GIF and 8-bit DIB, and either 4-bit DIB or 8-bit PIC formats.

This two volume set is a compilation of photographs previously published on Nautilus, the CD-ROM based multimedia magazine.

Suggested retail price: \$69.95 (plus \$4 shipping and handling North America; \$12 shipping and handling International)
