Great Internet Articles, Super Multimedia Madness
Jesse Silverglate, Miami, FL, USA

Thanks for the excellent articles related to the Internet (May issue). I would like to see additional files that your staff find interesting. I would like to see some of the USENET files that might be appropriate for a general audience interested in computing. The Write file containing the first three chapters of Tracy LaQuey's book "The Internet Companion" was difficult to read due to the incompatible formatting between the original text and Write. I have read the entire book and use it whenever I need basic information on the Internet. It is filled with specific examples of how to access all areas of the Internet. I highly recommend it to anyone interested.

Also, I really enjoyed what Ron Wodaski did with video, animation and sound. The tutorial helped to take some of the mystery out of the creative process, while the six small files at the end of his tutorial show some of the possibilities of creatively combining animation and video to go far beyond talking head .AVI. The small .AVI files play very effectively from hard disk or RAM. I look forward to more samples in the future.
