

VOL3_5 Errata Sheet

Prepared 6/4/93

Multimedia: More Video Madness/MAD35.TBK

Some subscribers may experience problems with this video. Here is a work around: Copy the TBKMM.SBK from the mmedia/madness directory to the Nautilus directory on your hard drive. You will need to remove the existing TBKMM.SBK file from your Nautilus directory. Add the following section and line to your WIN.INI:

[ToolBook]

StartupSysBooks=C:\Nautilus\TBKMM.SBK

Be sure to check the path for Nautilus to indicate the location on your system.

However, if you have problems with other ToolBook applications delete the StartupSysBooks line. We will be republishing More Video Madness 3-5 on the June issue of Nautilus, Vol. 3-6 in the Services/Corrections section. We apologize for any inconvenience that this may have caused you.
