Best of MIDI Connection, Two Volume Set

Song writers, performers, and students will enjoy this collection of MIDI compositions. There are over 500 classical, ragtime and contemporary MIDI pieces to choose from, ranging from piano works requiring a single MIDI instrument to full orchestral works designed to be used in a multi-timbral MIDI environment.

As a library of musical building blocks, Best of MIDI Connection is perfect for song writers planning to create their own masterpieces and performers working to improve their improvisational skills. And, as a collection of historically important works, it is a valuable source of reference material for music students.

MIDI files have been saved in Master Tracks Pro(tm) format (Passport Designs) and as Standard MIDI files ready to import into any MIDI software.

This two-volume set is a compilation of MIDI pieces previously published on Nautilus, the CD-ROM based multimedia magazine.

Suggested retail price: $69.95 (plus $4 shipping and handling North America; $12 shipping and handling International)
