

Celestial Navigations
Le Roy De Neault, La Grange, IL, USA

Just got Vol. 3-8; so far I think it's great. I sort of miss the .AVI file for the story "Ice," rather than the CD track provided.

From the Nautilus Team:

We have a number of video performances from Celestial Navigations, and we'll be alternating that video with audio cuts from the three existing albums. Be sure to view the new introductory video from Geoffrey Lewis on this disc, which includes an announcement of the next Celestial Navigations album.
