Just What I'm Looking For
Martin Sabaj, South Bend, IN, USA

I've been amazed at how Nautilus often seems to have just what I'm looking for when I'm looking for it. For example, I started using a Mac Trashcan-like utility called Trashman (available as shareware) which can appear as several different icons. I chose the toilet icon and was wondering how I could obtain the sound of a toilet to attach to it. The very next issue of Nautilus had this for me. Thank you.
