

What a Difference!  
John Zielke, Fallon, NV, USA

I have received only a few CD ROMs since I started my subscription to Nautilus and just wanted to let you know that each one gets better.

When I first saw you at the Fall Comdex '92 show, I didn't know what to expect, but I sent for an introductory disc anyway.

At the time I was anticipating purchasing a CD ROM player, so Nautilus was looking terribly interesting to me, even though CD ROMs were a mystery to me at that point.

Well, it took several months to finally purchase the CD ROM drive. I tried out the disc, only to see text flash across my screen in a non-interesting way. I remember thinking then that this is a great storage medium, but that's about it.

Until I purchased my sound card.

What a difference! Your disc LEAPED OUT AT ME so much so that I ordered both Backpacs. I enjoy keeping tabs on the computer market, seeing what the Space program had done, and listening to the wonderful music you place on each disc.

**From the Nautilus Team:**

**We appreciate your sharing this information and urge you to check the Technical Letters each issue. Many subscribers share information about their experience with sound and video cards, memory, and other items that enhance their use of Nautilus.**

**By the way, we're happy to announce the availability of Backpac 3. You'll find details this month in the Nautilus Services section.**
