# **Bubba 95.1.2**

# Build 4265.43868832

## Copyright 1995 by OsoSoft, George Campbell, and John Jacobsen

#### INTRODUCTION

Y'all have seen some of them programs fer Winders which is s'posed to make yer life easer by pretendin' to be an office or a desk or somethin, right? Some of 'em even got a person's name on 'em. Well, here's Bubba 95, which does some of the same stuff, but it ain't serious at all. If'n y'all want to use it, tho, y'all kin be my guest. Bubba don't take up much space and don't need much memory or nuthin' like that.

## WHAT Y'ALL CAN AND CAIN'T DO

Bubba 95 don't cost nuthin. They ain't no registration fee nor no money y'all gotta spend. But, you cain't sell it to nobody nor put it in with no commercial program without you talk to my friend, George Campbell first. If Y'all distribute shareware or freeware, tho, y'all can send Bubba 95 around here and there like any other of the stuff y'all distribute.

Bubba 95 and all what comes with it is protected under U.S. and foreign copyright laws. All rights are reserved.

We done tried our durndest to make this here program work OK, but if it don't work for y'all, don't come crying to us. We done our best. If y'all do need to get in touch with one of us, tho, y'all see the end of this paper....

#### WHAT Y'ALL NEED

If y'all are gonna use *Bubba 95*, y'all gotta have Winders 3.1, 2MB of RAM, a mouse, and hard disk.

#### **PUTTIN' BUBBA ON YOUR COMPUTER**

Bubba 95 got wrote in Visual Basic 3.0, so y'all need the VBRUN300.DLL library if y'all are goin' to use Bubba. If y'all don't already have a copy, you can download VBRUN300.ZIP from the OsoSoft BBS at (805) 528-3753, or jest 'bout anywhere y'all can find shareware stuff.

Jest do what I tell y'all below, and Bubba'll be happy:

- 1. Copy VBRUN300.DLL to your WINDOWS\SYSTEM directory.
- 2. Copy **BUBBA.EXE** and all them other files that come with it into some directory on your hard disk. Y'all might wanna make a directory called **C:\BUBBA** and copy them files in there.
- 3. In Program Manager, click inside some program group where y'all want Bubba's icon.
- 4. Click **File** then **New**, then click **OK**. Now, y'all need to type the stuff below just like I wrote it, or Bubba ain't gonna work:

In the Description box, type: Bubba

In the Command Line box, type: C:\BUBBA\BUBBA.EXE

In the Working Directory box, type: **C:\BUBBA** Click **OK** to finish the job.

**NOTE**: Since y'all are smart enough to run a computer, y'all know that if you put them files in some other directory, y'all need to type that stuff in instead of what I typed.

5. That's all they is to it.

#### **MAKING BUBBA RUN**

Whenever y'all want to use Bubba, jest double-click on the Bubba icon. That's all they is to it.

#### **USING BUBBA**

Jest like them other program what are somethin' like Bubba, y'all don't need no manual to use Bubba. Jest click on stuff in the winder when Bubba's runnin'. It don't make no nevermind where you click exactly...Bubba'll tell y'all what to do.

#### **OTHER PROGRAMS**

Bubba asked me to tell y'all that OsoSoft, them folks what come up with Bubba 95, has got some other stuff fer sale. If y'all like Bubba, take a look at some of them other programs. Y'all can find 'em on the OsoSoft BBS. Jest call up 805/528-3753 with y'all's modem. Or if y'all use CompuServe, head on over to the OsoSoft support section. Jest **GO OSOSOFT**, then set a spell and have a look around.

If y'all need to get in touch with them OsoSoft folks some other way, here's some more stuff you'll need to know:

OsoSoft 2122 9th St., Suite 202 Los Osos, CA 93402 (805) 528-1759 (805) 528-3074 (fax) (805) 528-3753 BBS

CompuServe: 74774,442 or GO OSOSOFT
