

## About Copyto for Windows95/NT4.0

---

Copyto is a Explorer Add-on that adds a menu "Copyto" to copy,move,delete,update,synchronize files in two folders.You can select the target folder easily by using the browse button.

- Briefcase like function that can synchronize files in two folders with filetype filtering and excluding specified folders.

Display the Operation list before execution. You can select or deselect files in the list by Right click.

- You can run Copyto.exe at the DOS prompt or created shortcut link with command line options.
- Batch operation by using MS-DOS batch file.
- Supports UNC paths.

This software is shareware.(However,the functions to copy,move,delete can be used freely forever)

You are entitled to evaluate the software for up to 30 days without obligation to pay.

After 30 days, if you decide to keep the "full-featured" software, you must register your copy with us for a small fee.

## Environment

---

Windows 95 and Windows NT4.0(Service Pack 2)

I confirmed the main features work fine with US and Japanese version.

## Install & Uninstall

---

### Archive Contents

|              |                                       |
|--------------|---------------------------------------|
| Copyto.inf   | Setup information file                |
| Cptoshex.dll | Copyto shell extension DLL            |
| Copyto.exe   | Copyto program file                   |
| Copytoun.exe | Copyto uninstall program file         |
| Copyto.hlp   | Copyto help file                      |
| Copyto.cnt   | Copyto help contents file             |
| Inffile.reg  | Registration Entries for ".inf" files |
| Readme.txt   | Readme file                           |

### Install

To install Copyto, extract the distributed files to any directory (name of less than 64 bytes). Then find the new file called "Copyto.inf". Right-click it, then choose Install.

It is possible that the popup menu for "Copyto.inf" may not display an install command. This will most likely be if you have associated ".inf" files with a different command. If this is the case try double-clicking the file "Install.reg", this will restore the original association for ".inf" files.

### Uninstall

Use the Control Panel, Add/Remove Programs item. Select the Copyto item (listed as "Copyto (Remove Only)") and click the Add/Remove button.
