their respective owners.

History

One year ago I used *Windows 95* and *CyrWin*. It was very inconvenient, that the window *CyrWin* was present at taskbar and on screen. Then the program *HideIt* has got to my hands. It allowed me to be saved from presence *CyrWin* at a taskbar. But *HideIt* had a too large size and hadn't some possibilities necessary to me. Therefore I have decided to write the similar program, with possibilities, necessary for me.

The result is before your eyes.

Version 1.4

Added Russian help.
Added hotkeys for run screen saver and logoff, reboot, shutdown and terminate processes.
Added additional options for automatic hide.

Version 1.3

Added hotkeys for minimize, maximize and restore windows.
Added Russian language support.
Added possibility for hide programs by filename.

Version 1.2

Added hotkeys and context help.

Version 1.1

The problem with hidden windows of other processes was solved.
This help was written.

Version 1.0

The some error was fixed by work under Windows NT.
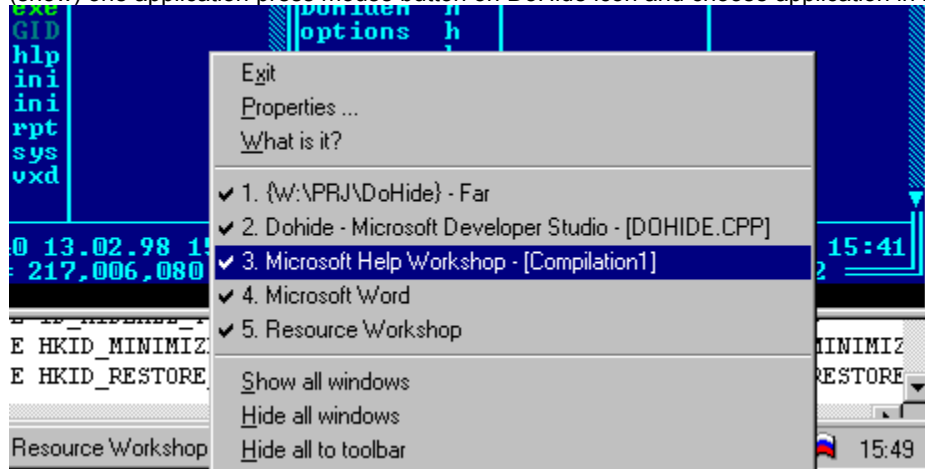

Version 0.9

First attempt.

Using DoHide

DoHide allows remove any program, including the DOS programs, from a screen/taskbar and ALT+TAB chain. DoHide can automatically hide the started application. DoHide has hot keys for hide (show) all (current) windows, include hide to notification tray.

Normally, the DoHide is running in notification tray. If it is running, you may find it on lower right corner on the screen. For a show of the task list - double click on DoHide icon on taskbar.
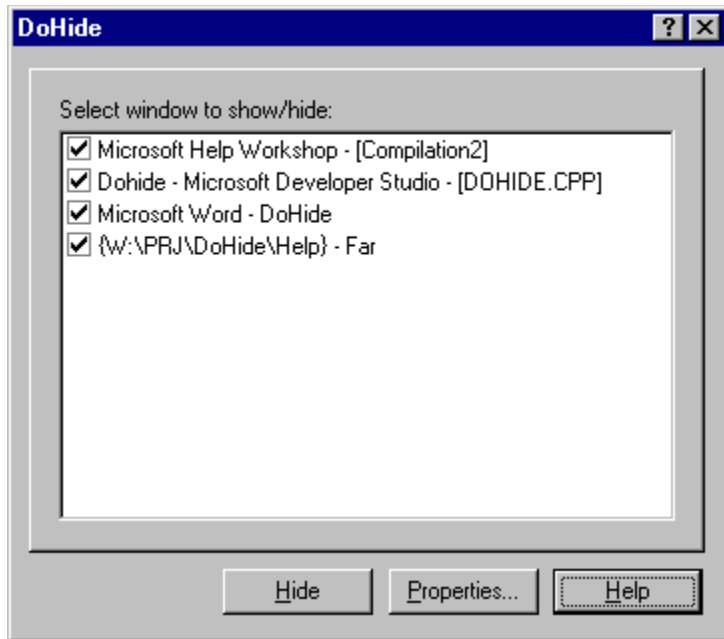

If you press mouse button on DoHide icon on the tray, you take the menu with some additional items. For a hide (show) one application press mouse button on DoHide icon and choose application in menu.

If you want to know, what any element of a dialog window means, simply press left mouse button on the picture.

1. DoHide task list

2. DoHide properties

Tab **Options**

> **Disable startup dialog**
>
> **Don't use "hide by filename" algorithm**
>
> **Èñïîëüçîâàòü Ðóññêèé ÿçûê â äèàëîãàõ**
>
> **Hide windows from menu to toolbar**
>
> **Show Desktop Icon**
>
> **Show WS_OWNER windows**
>
> **Show invisible windows**
>
> **Hide by Run ...**
>
> **DoHide Home page**

Tab **Hotkeys**

> **Hide ALL windows full**
>
> **Hide CURRENT window**
>
> **Hide ALL windows to taskbar**
>
> **Hide CURRENT window   to taskbar**
>
> **Hide windows again, hidden by run**
>
> **Show ALL windows**
>
> **Minimize ALL windows**
>
> **Minimize CURRENT window**

The visible windows are checked by ☑. For hide or show a window press by mouse button specified line.

The visible windows are checked by ☑. For hide or show a window press by mouse button specified line.

Hide a DoHide window.

Show the properties dialog box.

List of windows titles or full file paths, which will be hidden with start. Each title or file path should be place on a separate line. You can enter only part of window title. Windows titles, but not file paths, are case sensitive. Before title or file path you can set some options.

For example: @TMFC@CD player

where   T - mean window will be hidden to toolbar

             F - mean window will be hidden when title fully equal

             M - mean window will be hidden if it minimized

             Ñ - case insensitive title compare

DoHide can hide by full file path only Win32 GUI applications, therefore Win16 applications and Win32 console applications excluded from this possibility.

DoHide automatically will be hidden by start, when this button checked.

Provides information on how to perform tasks in this dialog.

Hotkey for hide all windows.

Hotkey for hide all windows to toolbar.

Hotkey for hide current window.

Hotkey for hide current window to toolbar.

Hotkey for show all windows.

Hotkey for repeat hide windows, which were hidden by run.

Hotkey for minimize all windows.

Hotkey for minimize current window.

Hotkey for restore all minimized windows.

Hotkey for maximize current window.

Hotkey for run default screen saver.

Hotkey for logoff from computer.

Hotkey for computer shutdown.

Hotkey for computer reboot.

Check this option if you don't want to use "hide by filename" possibility. When this option checked, you free some memory.

Âûáåðèòå ýòó îïöèþ, åñëè Âû õîòèòå èñïîëüçîâàòü Ðóññêèé ÿçûê â äèàëîãàõ. Ðóññêèé ÿçûê ìîæíî áóäåò èñïîëüçîâàòü ïîñëå íàæàòèÿ êíîïêè ÎÊ.

Check this option if you want to look Desktop Icons as a window in windows list.

Check this option if you want to look windows with WS_OWNER attributes in windows list. There is a situation, when the window is present on the screen, but it is not present in the list of windows. The set of this option can solve this problem.

Check this option if you want to look invisible (when DoHide start) windows in windows list. It is recommended to set this option only temporarily and before an exit from DoHide to remove it, because DoHide with an exit makes seen all windows.

Check this option if you want to add this items to menu.

Check this option if you want hide windows to toolbar, instead of completely.

Press this button to get on home page DoHide.

Hotkey for terminate process.

Be careful killing a process. It stops process immediately, and any unsaved information will be lost, so it should be used only when really necessary.

Add to startup

You can add DoHide to the Windows Startup as follows:

To add DoHide to the Windows Startup Group
  1. Click **Start** on the Taskbar (the taskbar is the Windows 95/NT menu usually located at the bottom of the screen)
  2. Click Settings | Taskbar
  3. Click the Start Menu Programs tab
  4. Choose **Add...**
  5. Enter the location of DoHide.exe. (i.e.,. C:\Program Files\DoHide.exe)
or
      Choose **Browse...** and select the DoHide.exe file
  6. Choose **Next**
  7. Select the Startup folder to place the shortcut in.
  8. Choose **Next**
  9. Enter the desired text to appear in the Startup folder
10. Choose **Finish**

Remove from startup

To remove DoHide from the Windows Startup Folder

1. Click **Start** on the Taskbar (the taskbar is the Windows 95/NT menu usually located at the bottom of the screen)
2. Click **Settings | Taskbar**
3. Click the **Start Menu** Programs tab
4. Choose **Remove...**
5. Find the Startup folder in the **Remove Shortcuts/Folders** dialog.
6. Click the plus sign (**+**) to expand the Startup folder
7. Select the DoHide icon
8. Choose **Remove**
9. Choose **Close**
10. Choose **OK**

Installing/Uninstalling

To Install DoHide

  1. Create a folder for DoHide (such as C:\Program Files\DoHide)
  2. Unzip file DoHide14.zip to this folder
  3. Run DoHide.exe

Most users will find it useful to place a shortcut in the startup group so that DoHide automatically starts, when Windows is started. You can do this at any time. See <u>Add to startup</u>.

To Uninstall DoHide

Delete the Shortcut to DoHide.exe from startup group and the folder, which contains DoHide.exe together with all the files, related to DoHide.

What is the DoHide?

DoHide allows remove any program, including the DOS programs, from a screen/taskbar and ALT+TAB chain. Your may find DoHide more powerful than other similar programs.
