    - Internet browser History (Netscape,Internet Explorer) .
    - Windows Start Menu recent document list(last 10 files you open).
    - Empties recycle bin files.
    - Duplicated files on your drives (Really fast search).
    - 4diskClean Gold is also plenty of graphics,disk and system information.
    - Also shows to user the large files on the drives,large directorys,and other statistics
      of disks.
    - Allows the user to make Zip files of the files deleted.

To install,unzip the file,run the setup.exe,do not delete any file of these
installation,if its there,its necessary to the proper running of the software.
Default folder to install is C:\4DiskCleanG\

Microsoft Windows 95/98/NT compatible,designed to work in any idiom.

Next step: Running the program

4DiskClean Gold Help Contents: **Running the program**

Double click 4DiskClean icon or file name on windows explorer,or click the shortcut
on the start menu, to open the software.
The use is very easy and intuitive,you first search for files,after you delete,based on the
files showed on the grids,you can mark a file to be exclude or not on the list,you can search
for the extensions you mark,can delete from disk,or to recycle bin,make a zip file for backup or
not.All the options you set are permanently recorded and will stay the same
way every time you open the product,until you   change it again.
Basically on every screen select the drive letter you like to clean / view information,for
more usage tips,see the tips buttons on the programm.

email adress is added to a database of customers,all upgrade links are sent to customers).
EMAIL for info ,questions,etc: sehnem@ez-poa.com.br   Subject : 4DiskClean.

What is the shareware concept?
This software program is distributed as shareware.   The essence of shareware is to provide you
with software that you get to "try before you buy", while rewarding the efforts of the developers.
When you think about it, the opportunity to try before you buy is the ultimate guarantee of a
product's quality and usefulness to you.   In fact, shareware can be just as professionally
developed as software that comes in a fancy box (with a lot of hype and yet no way to determine
issues such as the "look and feel", etc.), but the price of shareware can be set lower because it
does not have to cover expensive marketing costs.   Still, software businesses that market their
products as shareware need to get paid for their efforts just as any other business.   When you
support the shareware concept, it ensures that the concept will continue to work and you will
continue to get to "try before you buy".   Thank you for understanding and honoring the
"shareware" concept.
