# Invisible Files 2000

IMPORTANT: Read <u>LICENSE AGREEMENT</u> before using **IF2000**.

        Invisible Files 2000 (**IF2000**) is a program, which allows you to hide any file, folder or group of files/folders on your hard disk(s).
    Below a main window of **IF2000** is presented. To learn more about **IF2000** controls right click to control area.

    IF2000 can hide any file or folder on your hard disk(s). To hide files/folders you may use patterns. Pattern is a string that is used for filtering filenames. In patterns you can use metacharacters *?. * – replaces any substring; ? – replaces any one char.
    As you see main IF2000 window consists four main areas: pattern area, area of "List of hidden files/folders", area of "List of files, which will be visible", edit area.
    In pattern area you can enter pattern or browse for a file to hide. Pattern from this area you may add to "List of hidden files/folders".
    To make files/folders visible select patterns in "List of hidden files/folders" and remove it to "List of files, which will be visible". You can undo this operation by selecting patterns in "List of files, which will be visible" and removing it to "List of hidden files/folders".
    To change pattern in "List of hidden files/folders" select pattern in "List of hidden files/folders", then click to edit area.

    You may protect IF2000 configuration utility from casual user by setting entrance password. Click **Set password** button to change entrance password.

NOTE: All changes will take effect after you reboot system.

Read <u>TIPS</u>...

TIPS

TIP: Use pattern like **myhidden*** to hide all files with **myhidden** on begin of name. If you create file (or folder) with **myhidden** on begin of name, this file will be hidden also.

TIP: Use *.PGP pattern to hide your encrypted files.

TIP: Use *.PKR, *.SKR patterns to hide your PGP public and secret keys.

TIP: Create directory (HIDEDIR for instance), move files you wish hide to this directory and hide directory. All files in this directory will be hidden.

TIP: Use right-click menu in Explorer to hide files/folders.
